

# Test Plan Report

21/02/2025

Project : Powergear - RFQ Response Builder

Test Plan : PowerGear

Folder : Powergear - RFQ Response Builder

## Table Of Contents

---

### 1.1.Sign-In page

- #1: Verify the login page elements
- #2: Verify login with valid credentials
- #3: Verify login with invalid credentials
- #4: Verify login with empty fields
- #5: Verify "Work Mail" field validation
- #6: Verify password masking functionality
- #7: Verify login with case sensitivity in email and password
- #8: Verify behavior when only the email field is filled
- #9: Verify behavior when password format is invalid
- #10: Verify behavior when login button is clicked without entering any field

#### 1.1.1.Forgot Password

- #11: Verify the Forgot Password Link Navigation
- #12: Verify Error Message for Non-Registered Email
- #13: Verify Popup Message for Registered Email
- #14: Verify Password Reset Link in Email
- #15: Verify Navigation to Reset Password Page from Email Link
- #16: Verify Password Validation on Reset Password Page
- #17: Verify Password Confirmation
- #18: Verify Successful Password Reset
- #19: Verify Navigation to Sign In Page After Password Reset
- #20: Verify Login with Updated Credentials
- #21: Verify UI and Accessibility of Forgot Password Page
- #22: Verify Behavior for Blank Email Submission
- #23: Verify Handling of Invalid Email Format
- #24: Verify Behavior for Incomplete Password Requirements
- #25: Verify Password Masking Behavior
- #26: Verify Behavior for Mismatched Password and Confirm Password Fields

## **1.2.Profile**

- #27: Verify user can change profile details in Powergear application
- #28: Verify email validation for Work Email
- #29: Verify Profile Photo upload validation
- #30: Verify uneditable fields in Profile page
- #31: Verify "Save Changes" functionality after editing profile details
- #32: Verify "Edit Profile" button functionality
- #33: Verify toast message after saving profile changes

#34: Verify the system behavior when the user cancels profile editing

#35: Verify user can change the password in Powergear application

#36: Verify password validation rules for the new password

#37: Verify user cannot set the new password same as the old password

#38: Verify "Change Password" button functionality

#39: Verify successful password change after confirming new password

#40: Verify error message for invalid current password

#41: Verify mismatch between new password and confirm password

#42: Verify password change cancel functionality

#43: Verify toast message after unsuccessful password change

#44: Verify visibility of assigned tasks in the Task list

#45: Verify task columns are displayed correctly

#46: Verify navigation to the assigned task page by clicking on a task

#47: Verify task list is empty if no tasks are assigned

#486: Verify Sorting by Task ID in Ascending Order

#487: Verify Sorting by Task ID in Descending Order

#488: Verify Sorting by Task Name in Ascending Order

#489: Verify Sorting by Task Name in Descending Order

#490: Verify Sorting by Proposal Title in Ascending Order for Task list

#491: Verify Sorting by Proposal Title in Descending Order for task list

#492: Verify Sorting by Due Date in Ascending Order for Task List

#493: Verify Sorting by Due Date in Descending Order Task List

#494: Verify Sorting Functionality When No Tasks Are Available

#495: Verify That Completed Tasks Are Not Visible in the Task List

### **1.3.Historical Proposal**

#48: Verify Upload Functionality for a Single Proposal

#49: Verify Mandatory Fields in Single Proposal Upload

#50: Verify Document Upload Validation

#51: Verify Success Message After Proposal Upload

#52: Verify Uploaded Proposal Appears in the Table

#53: Verify Validation for Missing Proposal Title

#54: Verify Validation for Missing Client Name

#55: Verify Validation for Missing Bid Status

#56: Verify Upload Behavior for Missing Mandatory Documents

#57: Verify Support for Additional Tags

#58: Verify File Type Restriction for Supporting Documents

#59: Verify Cancel Button Functionality During Proposal Upload

#60: Verify Duplicate Proposal Upload Prevention

#61: Verify Pagination in Uploaded Proposals Table

#62: Verify Success Message Display After Proposal Upload

#63: Verify Handling of Large File Sizes During Proposal Upload

#64: Verify Character Limit Validation for Proposal Title

#65: Verify Character Limit Validation for Description Field

#66: Verify sorting of Proposal Id column

#67: Verify sorting of Proposal Title column

#68: Verify sorting of Client column

#69: Verify sorting of Due Date column

#70: Verify default sorting order of Proposal columns

#71: Verify filter functionality using the Client field

#72: Verify filter functionality using the Tag field

#73: Verify filter functionality using the Bid field

#74: Verify filter functionality using the Status field

#75: Verify filter functionality using the Due Date field

#76: Verify applying multiple filters simultaneously

#77: Verify filter functionality when no results match applied filters

#78: Verify reset functionality clears all applied filters

#79: Verify filter popup behavior when closing without applying

#80: Verify search functionality using Proposal Id

#81: Verify search functionality using Proposal Title

#82: Verify search functionality using Client

#83: Verify search behavior when no results match the search query

#84: Verify search functionality with partial text matching

#85: Verify case-insensitive search

#86: Verify handling of special characters in the search query

#87: Verify default view is List view in Historical Proposal section

#88: Verify switching from List view to Grid view in Historical Proposal section

#89: Verify switching from Grid view to List view in Historical Proposal section

#90: Verify grid view displays folder structure with proposal titles

#91: Verify visibility of documents/files in the Proposal

#92: Verify functionality of the "View" option for proposal documents/files

#93: Verify functionality of the "Download" option for proposal documents/files

#94: Verify functionality of the "Delete" option for proposal documents/files

#95: Verify file deletion after confirming the "Delete" action

#96: Verify that user cannot delete a file without confirming the delete action

#97: Verify that the user can see the document name and type in the file list

#98: Verify file is not deleted if the user cancels the confirmation in the popup

#99: Verify that the file is opened in the view popup when clicked on the "View" icon

#100: Verify the visibility of the "Upload" button inside the proposal

#101: Verify the upload popup opens when clicking on the "Upload" button

#102: Verify the user can drag and drop files in the upload popup

#103: Verify the user can select files to upload using the file picker

#104: Verify the file upload functionality after selecting a file

#105: Verify that the file is uploaded successfully

#106: Verify the supported file types for upload

#107: Verify that the user can cancel the file upload

#108: Verify error message when trying to upload unsupported file types

#109: Verify UI behavior when selecting multiple files for upload

#110: Verify the visibility of the file search box

#111: Verify the functionality of the file search box

#112: Verify search returns matching files based on file name

#113: Verify search returns no results for non-matching file names

#114: Verify partial match search for file names

#115: Verify case-insensitive file name search

#116: Verify search functionality with special characters in file names

#117: Verify search box resets when cleared

#118: Verify visibility of the "Edit" icon for proposals

#119: Verify the "Edit Proposal" popup opens upon clicking the edit icon

#120: Verify editable fields in the "Edit Proposal" popup

#121: Verify reset functionality clears edited fields

#122: Verify "Save Changes" functionality after editing a proposal

#123: Verify success message after saving edits

#124: Verify the system behavior when canceling edits

#125: Verify field length validation for Title and Tags

- #126: Verify date picker functionality for Due Date field
- #127: Verify error message for duplicate proposal titles
- #128: Verify the visibility of the "Download" icon for proposals
- #129: Verify functionality of the "Download" option for proposals
- #131: Verify the delete confirmation popup appears on clicking "Delete"
- #132: Verify proposal deletion after confirming the "Delete" action
- #133: Verify that proposals are not deleted without confirming the delete action
- #134: Verify success message after successful proposal deletion

#### **1.4.User Management**

- #135: Verify visibility of "Add User" button in User Management section
- #136: Verify the "Add User" button functionality
- #137: Verify mandatory fields in the "Add User" popup
- #138: Verify Work Email validation during user creation
- #139: Verify duplicate user validation when adding a new user
- #140: Verify successful user creation
- #141: Verify email invitation sent after user creation
- #142: Verify Role dropdown functionality
- #143: Verify "Create User" button functionality
- #144: Verify cancel button functionality in "Add User" popup
- #145: Verify field validation for "Full Name" in the "Add User" popup
- #146: Verify the error message when the "Full Name" field is left empty
- #147: Verify the error message when the "Work Email" field is left empty
- #148: Verify user creation with both "Bid Manager" and "Team Member" roles
- #149: Verify user invitation sent to new user email address
- #150: Verify Visibility of Edit Icon for Users

#151: Verify Edit Popup Opens Upon Clicking Edit Icon

#152: Verify Editing Name and Role

#153: Verify Reset Button Resets Edited Fields

#154: Verify Cancel Button Cancels Edits

#155: Verify Save Changes Button Saves Edits

#156: Verify Non-editable Work Email in Edit Popup

#157: Verify Edit User Saves Successfully

#158: Verify Role Can Be Edited for Existing Users

#159: Verify the Visibility of Filter Button in User Management Section

#160: Verify Filter Popup Opens Upon Clicking the Filter Button

#161: Verify Role Dropdown Functionality in Filter Popup

#162: Verify "Working On" Dropdown Functionality in Filter Popup

#163: Verify User Filtering by Role

#164: Verify User Filtering by "Working On"

#165: Verify User Filtering with Multiple Selections in Role Dropdown

#166: Verify User Filtering with Multiple Selections in "Working On" Dropdown

#167: Verify Reset Functionality Clears All Filter Selections

#168: Verify Filter Popup Closes After Clicking Apply Button

#169: Verify Filter Behavior When No Results Match

#170: Verify User Can Clear All Filters After Applying

#171: Verify Visibility of Search Box in User Management Section

#172: Verify User Can Search by UserID

#173: Verify User Can Search by Username

#174: Verify User Can Search by Email

#175: Verify User Can Search by Role

#176: Verify User Can Search by "Working On" Field

#177: Verify Partial Match Search for UserID

#178: Verify Partial Match Search for Username

#179: Verify Partial Match Search for Email

#180: Verify No Results Found When No User Matches Search Criteria

#181: Verify Sorting by UserID Column

#182: Verify Sorting by Username Column

#183: Verify Sorting by Email Column

#184: Verify Visibility of Delete Icon for Users

#185: Verify Delete Confirmation Popup on Clicking Delete Icon

#186: Verify User Is Not Deleted If the Delete Action Is Not Confirmed

#187: Verify Success Message After Successful User Deletion

#188: Verify Visibility of the User After Cancelling the Delete Action

### **1.5.New Proposals**

#189: Verify Visibility of "Upload File" window

#190: Verify Accepted File Types for Upload

#191: Verify Error Message for Unsupported File Types

#192: Verify File Upload Functionality

#193: Verify ML Model Processes Uploaded File

#194: Verify Display of Similar Proposals

#195: Verify "View" Button Functionality

#196: Verify No Data for Non-matching Proposals

#197: Verify "Draft Proposal" Button Functionality

#198: Verify Maximum File Size Limit for Upload

#199: Verify Loading Indicator During ML Model Processing

#263: Verify Visibility of Sort Icons for Proposal ID, Proposal Title, and Similarity Score Columns

#264: Verify Sorting by Proposal ID Column in Ascending Order

#265: Verify Sorting by Proposal ID Column in Descending Order

#266: Verify Sorting by Proposal Title Column in Ascending Order

#267: Verify Sorting by Proposal Title Column in Descending Order

#268: Verify Sorting by Similarity Score Column in Ascending Order

#269: Verify Sorting by Similarity Score Column in Descending Order

#270: Verify Default Sorting Order on Page Load

#271: Verify Visibility of "Draft Proposal" Button

#272: Verify Navigation to Proposal Overview Page on Clicking "Draft Proposal"

#273: Verify Default Proposal Structure on Proposal Overview Page

#274: Verify Editing an Existing Section in Proposal Structure

#275: Verify Adding a New Section to Proposal Structure

#276: Verify Adding a Subsection Under a Main Section

#277: Verify Removing an Existing Section from Proposal Structure

#278: Verify Validation for Empty Section Names

#279: Verify Visibility of "Generate Proposal with AI" Button

#280: Verify AI Generates Description for All Sections and Subsections

#281: Verify AI-Generated Descriptions Are Displayed for Sections

#283: Verify AI-Generated Description Accuracy

#284: Verify Enlarge Icon Functionality for Preview

#285: Verify Visibility of "Unassigned (+)" Icon for Sections and Subsections

#286: Verify "Assign Section" Popup Opens on Clicking "Unassigned (+)" Icon

#287: Verify Assignee Dropdown Displays Available Team Members

#288: Verify Reviewer Dropdown Displays Available Bid Managers

#289: Verify Mandatory fields

#290: Verify Due Date Fields Accept Valid Dates

#291: Verify Successful Assignment of Section with Assignee and Reviewer

#292: Verify Status Changes to "Unanswered" After Section is Assigned

#293: Verify Cancel Button Closes the "Assign Section" Popup Without Changes

#294: Verify Error Message for Past Dates in Due Date Fields

#295: Verify Multiple Sections and Subsections Can Be Assigned Independently

#296: Verify Visibility of Start Date and End Date Fields

#297: Verify Start Date Field Accepts Valid Dates

#298: Verify End Date Field Accepts Valid Dates

#299: Verify Start Date Cannot Be Set in the Past

#300: Verify End Date Cannot Be Earlier Than Start Date

#301: Verify Error Message for Invalid Date Ranges

#302: Verify Visibility of Comment Icon for Sections and Subsections

#303: Verify Existing Comments Are Displayed on Clicking Comment Icon

#304: Verify User Can Add a New Comment to a Section or Subsection

#305: Verify Tagging a User in Comments

#306: Verify Saving a New Comment with a Tagged User

#307: Verify Notifications for Tagged Users

#308: Verify Display of Timestamp for Comments

#309: Verify Comment Count Updates on Adding/Deleting Comments

#310: Verify Visibility of Delete Icon for Sections and Subsections

#311: Verify Alert Popup on Clicking Delete Icon

#312: Verify Canceling the Deletion Action Retains the Section/Subsection

#313: Verify Successful Deletion of Section/Subsection

#314: Verify Visibility of "Proposal Participants" Section

#315: Verify Visibility of "Add" Button in Proposal Participants Section

#316: Verify Add Participants Popup Opens on Clicking "Add" Button

#317: Verify Dropdown Lists Available Users for Selection

#318: Verify Selecting Multiple Users in the Dropdown

#319: Verify Adding Selected Users to Proposal Participants List

#320: Verify Cancel Button Closes the Add Participants Popup Without Changes

#321: Verify Updated Proposal Participants List After Adding Members

#322: Verify Visibility of Resource Bank Section

#323: verify Visibility of "+ Add Documents" Button

#324: Verify Upload Popup Opens on Clicking "+ Add Documents" Button

#325: Verify Supported File Formats for Upload

#326: Verify Drag and Drop Functionality for Uploading Documents

#327: Verify File Selection from Local Storage for supporting document

#328: Verify Successful Upload Adds Document to Supporting Documents Section

#329: Verify Cancel Button in Upload Popup of supporting document

#330: Verify Removing a Supporting Document

#331: Verify Preview Functionality for Supporting Documents

#332: Verify Visibility of Similar Proposals in Resource Bank Section

#333: Verify Matching Percentage Display for Similar Proposals

#334: Verify Visibility of Three Dots for Each Similar Proposal

#335: Verify "View" Option in the Three Dots Menu for Similar Proposals

#336: Verify Navigation to Historical Proposal Section on Clicking "View"

#337: Verify User Can Return to Resource Bank Section After Viewing Document

#496: Verify User Can Access the Budget Section

#497: Verify UI Elements for Budget Input Fields

#498: Verify Bill of Quantities Field Accepts Only Numeric Input

#499: Verify Taxes Field Accepts Only Numeric Input

#500: Verify Profit Margin Field Accepts Only Numeric Input

- #501: Verify Total Quote Calculation
- #502: Verify Submit Button is Disabled When Any Mandatory Field is Empty
- #503: Verify Budget Submission with Valid Data
- #504: Verify Budget Appears in Budget Section After Submission
- #505: Verify Budget Section Expands to Show Submitted Data
- #506: Verify Budget Submission with Negative Values
- #507: Verify Large Numeric Values in Budget Fields
- #508: Verify Decimal Values in Budget Fields
- #509: Verify User Can Add an Extra Field to Budget Estimation
- #510: Verify Added Extra Field Cannot Be Empty
- #511: Verify User Can Remove an Extra Field
- #512: Verify User Can Add More Details to an Extra Field
- #513: Verify Mandatory Validation for Additional Fields
- #514: Verify Numeric Validation for Cost/Hour, No. of Hours, and Count Fields
- #515: Verify Budget Submission with Extra Field and Additional Details

## **1.6.Resource Library**

- #204: Verify Visibility of Resource Library Section
- #205: Verify Display of Existing Documents in Resource Library
- #206: Verify Pagination in Resource Library Table
- #207: Verify Visibility of Search Box in Resource Library
- #208: Ensure the user can search for documents using the File Name and matching results are displayed in the table.
- #209: Verify Search by File ID
- #210: Verify Search by Tags
- #211: Verify Partial Match Search for File Name
- #212: Verify Partial Match Search for File ID

#213: Verify Partial Match Search for Tags

#214: Verify No Results Message for Invalid Search

#215: Verify Search is Case-insensitive

#216: Verify Search Results Reset When Search Query is Cleared

#217: Verify Sorting by File ID Column in Ascending Order

#218: Verify Sorting by File ID Column in Descending Order

#219: Verify Sorting by File Name Column in Ascending Order

#220: Verify Sorting by File Name Column in Descending Order

#221: Verify Sorting by Uploaded By Column in Ascending Order

#222: Verify Sorting by Uploaded By Column in Descending Order

#223: Verify Default Sorting Order When Page is Loaded

#224: Verify Visibility of Filter Options for "Uploaded By" and "Tags"

#225: Verify Filtering by "Uploaded By" with Single Selection

#226: Verify Filtering by "Tags" with Single Selection

#227: Verify Filtering by "Uploaded By" with Multiple Selections

#228: Verify Filtering by "Tags" with Multiple Selections

#229: Verify Reset Button Clears All Filters

#230: Verify "No Results Found" When Filter Criteria Do Not Match Any Document

#231: Verify Combining Filters for "Uploaded By" and "Tags"

#232: Verify Visibility of Upload Button in Resource Library Section

#233: Verify Upload Popup Opens Upon Clicking Upload Button

#235: Verify Error Message for Unsupported File Formats

#241: Verify Cancel Button in Upload Popup

#243: Verify Visibility of Action Icons on Hover

#244: Verify Document Opens in Preview Mode on Clicking "View"

#245: Verify "Edit" Popup Opens on Clicking "Edit" Icon

#246: Verify Successful Editing of File Name, Doc Detail, and Tags

#247: Verify Cancel Button in Edit Popup

#248: Verify File Download Functionality on Clicking "Download" Icon

#249: Verify Delete Confirmation Popup on Clicking "Delete" Icon

#250: Verify Successful Deletion of Document

#251: Verify Canceling Delete Action Retains the Document

#252: Verify Validation for Empty Fields in Edit Popup

#253: Verify "Doc Detail" Field is Mandatory in Upload Popup

#254: Verify Character Limit for "Doc Detail" Field

#255: Verify "Tags" Field Allows Selection of Existing Tags

#256: Verify "Tags" Field Allows Entry of New Tags

#257: Verify Drag and Drop Functionality for File Upload

#258: Verify File Selection from Local Storage

#259: Verify Error Message for Unsupported File Format

#260: Verify File Upload Completes Successfully

#261: Verify Document Appears in Resource Library Table After Upload

#262: Verify Error for Exceeding Maximum File Size Limit

## **1.7.AI Agent**

#338: Verify AI Agent Overview is Displayed Correctly

#339: Verify Document Trained Count

#340: Verify Document Untrained Count

#341: Verify Last Trained Days

#342: Verify Current Status Accuracy

#343: Verify Sorting by Model Version

#344: Verify Sorting by Last Trained On

#345: Verify Sorting by Data Size

#346: Verify Sorting by Accuracy

#347: Verify Default Sorting Order

#348: Verify Model Metrics Display

#349: Validate Accuracy Percentage on X-axis

#350: Validate Model Versions on Y-axis

#351: Validate AI Agent Response Similarity

#352: Display of AI Agent Responses

#353: Accurate Similarity Percentage Calculation

#354: Handling Invalid Queries

#355: Verify the display of AI model details.

#356: Verify the initial 'Live' status of a model.

#357: Verify 'Go Live' functionality for switching models.

#358: Verify only one model can be 'Live' at a time.

#359: Verify status update after clicking 'Go Live'.

#360: Verify Visibility of Start Training Button

#361: Verify Start Training Button Functionality

#362: Verify Display of Training Progress

#363: Verify Visibility of Validate Button After Training Completion

#364: Verify Navigation to Comparison Screen on Clicking Validate Button

#365: Verify Display of Original and AI-Generated Proposal Previews

#366: Verify Visibility of Explore Another Proposal Button

#367: Verify Explore Another Proposal Functionality

## **1.8.Proposal Bank**

#369: Verify Visibility of Proposal Bank Section

#370: Verify Display of Drafted Proposals in Proposal Bank

#371: Verify Visibility of Search Box in Proposal Bank

#372: Verify Search by Proposal ID

#373: Verify Search by Proposal Title

#374: Verify Partial Match Search by Proposal ID

#375: Verify Partial Match Search by Proposal Title

#376: Verify Search is Case-Insensitive for proposal bank

#377: Verify No Results Message for Invalid Search Queries

#378: Verify Resetting the Search Clears Results

#379: Verify Visibility of Sort Icons for Columns

#380: Verify Sorting by Proposal ID in Ascending Order

#381: Verify Sorting by Proposal ID in Descending Order

#382: Verify Sorting by Proposal Title in Ascending Order

#383: Verify Sorting by Proposal Title in Descending Order

#384: Verify Sorting by Client in Ascending Order

#385: Verify Sorting by Client in Descending Order

#386: Verify Sorting by Due Date in Ascending Order

#387: Verify Sorting by Due Date in Descending Order

#388: Verify Default Sorting on Page Load

#389: Verify Visibility of Filter Button in Proposal Bank

#390: Verify Filter Popup Opens on Clicking the Filter Button

#391: Verify Client Dropdown Field in Filter Popup

#392: Verify Tags Dropdown Field in Filter Popup

#393: Verify Bid Status Dropdown Field in Filter Popup

#394: Verify Due Date Date Picker in Filter Popup

#395: Verify Progress Range Filter (From and To)

#396: Verify Budget Range Filter (From and To)

#397: Verify Apply Button Applies Filters

#398: Verify Reset Button Clears All Filters for proposal

#399: Verify Filtered Proposals Are Displayed After Applying Filters

#400: Verify No Results Found When Filters Do Not Match Any Proposal

#401: Verify Filter Functionality With Multiple Filters Applied

#402: Verify Date Range Validation for Due Date Filter

#403: Verify Progress Filter Displays Correct Range of Proposals

#404: Verify Budget Filter Displays Correct Range of Proposals

#405: Verify Visibility of Edit Icon for Proposal

#406: Verify Edit Popup Opens on Clicking the Edit Icon

#407: Verify Visibility of Project Title Field in Edit Popup

#408: Verify Project Title Field Character Limit

#409: Verify Visibility of Client Field in Edit Popup

#410: Verify Client Field Character Limit

#411: Verify Due Date Date Picker in Edit Popup

#412: Verify Bid Status Dropdown in Edit Popup

#413: Verify Tags Field in Edit Popup

#414: Verify Save Changes Button Functionality

#415: Verify Reset Button Functionality

#416: Verify Successful Update of Proposal

#417: Verify Validation for Empty Mandatory Fields

#418: Verify Error Message for Invalid Due Date

#419: Verify Tags Dropdown Field Displays Existing Tags

#420: Verify Default Values for Fields When Editing

#421: Verify Visibility of Download Icon for Proposal

- #422: Verify Download Functionality for Proposal
- #423: Verify File Name and Format of Downloaded Proposal
- #424: Verify Visibility of Delete Icon for Proposal
- #425: Verify Alert Popup Appears on Clicking Delete Icon
- #426: Verify Cancel Button in Delete Confirmation Popup
- #427: Verify Successful Deletion of Proposal
- #428: Verify Role-Based Access for Download and Delete Icons
- #429: Verify Visibility of Eye Icon on Hover Over Proposal
- #430: Verify Functionality of Eye Icon to View Proposal
- #431: Verify Navigation to Proposal Overview Page After Clicking Eye Icon
- #432: Verify Display of Proposal Details on Proposal Overview Page

## **1.9.Activity Logs**

- #433: Verify Visibility of Activity Logs Section
- #434: Verify Visibility of Columns in Activity Logs
- #435: Verify Sorting Functionality for User Column
- #436: Verify Sorting Functionality for Date Column
- #437: Verify Sorting Functionality for Time Column
- #438: Verify Default Sorting on Page Load for Activity Logs
- #439: Verify Activity Log for "User Logged In"
- #440: Verify Activity Log for "User Logged Out"
- #441: Verify Activity Log for "Added Section/SubSection"
- #442: Verify Activity Log for "Updated Section/SubSection"
- #443: Verify Activity Log for "Assigned Member to a Section"
- #444: Verify Activity Log for "Changed Section Status"
- #445: Verify Activity Log for "Deleted a Section/SubSection"

#446: Verify Activity Log for "Added Participants to Proposal"

#447: Verify Activity Log for "Removed Participant from Proposal"

#448: Verify Activity Log for "Drafted New Proposal"

#449: Verify Activity Log for "Exported the Proposal"

#450: Verify Activity Log for "Downloaded Proposal Bank File"

#451: Verify Activity Log for "Downloaded Historical Proposal File"

#452: Verify Activity Log for "Downloaded Historical Proposal ZIP File"

#453: Verify Activity Log for "Started Training AI Agent"

#454: Verify Activity Log for "Switched AI Agent"

#455: Verify Visibility of Activity Logs for All Actions

#456: Verify Visibility of Filter Button

#457: Verify Filter Popup Opens on Clicking the Filter Button for activity logs

#458: Verify Filtering by User

#459: Verify Filtering by Role

#460: Verify Filtering by Multiple Criteria (Action, User, Role)

#461: Verify Reset Filter Functionality

#462: Verify No Results Message for Non-Matching Filters

#463: Verify Filtering by "User Logged In" Action

#464: Verify Filtering by "Added Section/SubSection" Action

#465: Verify Filtering by "Updated Section/SubSection" Action

#466: Verify Filtering by "Assigned Member to a Section" Action

#467: Verify Filtering by "Changed Section Status" Action

#468: Verify Filtering by "Deleted a Section/SubSection" Action

#469: Verify Filtering by "Added Participants to Proposal" Action

#470: Verify Filtering by "Removed Participant from Proposal" Action

#471: Verify Filtering by "Drafted New Proposal" Action

#472: Verify Filtering by "Exported the Proposal" Action

#473: Verify Filtering by "Downloaded Proposal Bank File" Action

#474: Verify Filtering by "Downloaded Historical Proposal File" Action

#475: Verify Filtering by "Downloaded Historical Proposal ZIP File" Action

#476: Verify Filtering by "Started Training AI Agent" Action

#477: Verify Filtering by "Switched AI Agent" Action

#478: Verify Applying Multiple Action Filters Together

#479: Verify Filtering by Action with No Matching Logs

#480: Verify Export Functionality for Activity Logs

#481: Verify Export Functionality for Filtered Activity Logs

#482: Verify Search Functionality for Activity Logs by Action

#483: Verify Search Functionality for Partial Action Text

#484: Verify Search Functionality When No Logs Match the Search Term

#485: Verify Search Functionality Reset

## **1.10.Dashboard**

#517: Verify Dashboard Loads Correctly

#518: Verify Proposal Count is Displayed Correctly

#519: Verify Bid Won Count is Displayed Correctly

#520: Verify Profit Margin is Displayed Correctly

#521: Verify Team Members Count is Displayed Correctly

#522: Verify In-Progress Proposal Count is Displayed Correctly

#523: Verify Table Displays In-Progress Proposals

#524: Verify Proposal ID is Displayed in the Table

#525: Verify Proposal Title is Displayed in the Table

#526: Verify Client Name is Displayed in the Table

#527: Verify Due Date is Displayed in the Table

#528: Verify Progress Bar is Displayed for In-Progress Proposals

#529: Verify Progress Bar Updates Based on Proposal Status

#530: Verify Proposal Metrics Chart is Displayed

#531: Verify X-Axis Displays Dates Correctly

#532: Verify Y-Axis Displays Proposal Count Correctly

#533: Verify Total Proposals Line is Displayed

#534: Verify Losing Proposals Line is Displayed

#535: Verify Winning Proposals Line is Displayed

#536: Verify Chart Updates Based on Data Changes

#537: Verify Donut Chart is Displayed

#541: Verify Hover Displays Percentage for Each Segment

#542: Verify Donut Chart Updates Based on Proposal Data Changes

#562: Verify Proposal Status Categories Are Displayed in Donut Chart

#563: Verify Percentage Calculation for Each Proposal Status

#564: Verify Hover Functionality on Donut Chart

### **1.11.Notification**

#543: Verify Team Member Gets Notification When a Section is Assigned

#544: Verify Team Member Gets Notification When There is Approval on a Section

#545: Verify Team Member Gets Notification When a Section is Rejected and Re-assigned

#546: Verify Team Member Gets Notification for Proposal Status Change (Submitted)

#547: Verify Team Member Gets Notification for Proposal Status Change (Won)

#548: Verify Team Member Gets Notification for Proposal Status Change (Shortlisted)

#549: Verify Notification for "Rejected" Status Change

#550: Verify Notification for "Not Selected" Status Change

- #551: Verify Notification for "Withdrawn" Status Change
- #552: Verify Notification for "On Hold" Status Change
- #553: Verify Bid Manager Gets Notification When a New Team Member is Added
- #554: Verify Bid Manager Gets Notification When a Section is Submitted for Review
- #555: Verify Bid Manager Gets Notification When a Budget Section is Added
- #556: Verify Bid Manager Gets Notification When AI Agent Training is Completed
- #557: Verify User Gets Notification When Mentioned in a Comment or Activity Section
- #558: Verify User Gets Notification When Added as a Participant for a Proposal
- #559: Verify User Gets Notification When Removed as a Participant for a Proposal
- #560: Verify "Mark All as Read" Button Functionality
- #561: Verify User Gets Notification When Proposal Status Changes to "In Progress"

**Project : Powergear - RFQ Response Builder**

---

AI powered RFQ response builder for Powergear

**1.1 Folder : Sign-In page**

---

#1 : Verify the login page elements	
Author	Dinesh Saiwal

Summary	Ensure the Powergear sign-in page displays the required fields: Work Mail and Password, along with a login button.
Precondition	User is on the Powergear sign-in page.
Estimated exec. duration (HH:MM)	
Priority	High

#2 : Verify login with valid credentials	
Author	Dinesh Saiwal
Summary	Ensure the user can successfully log in and navigate to the dashboard when valid credentials are provided.
Precondition	User has valid email and password credentials.User is on the Powergear sign-in page.
Estimated exec. duration (HH:MM)	
Priority	High

#3 : Verify login with invalid credentials	
Author	Dinesh Saiwal
Summary	Ensure the user sees an error message when entering invalid credentials.
Precondition	User is on the Powergear sign-in page.

Estimated exec. duration (HH:MM)	
Priority	High

#4 : Verify login with empty fields	
Author	Dinesh Saiwal
Summary	Ensure the user cannot log in when leaving the Work Mail and Password fields empty.
Precondition	User is on the Powergear sign-in page.
Estimated exec. duration (HH:MM)	
Priority	Low

#5 : Verify "Work Mail" field validation	
Author	Dinesh Saiwal
Summary	Ensure the Work Mail field accepts only valid email formats.
Precondition	User is on the Powergear sign-in page.
Estimated exec. duration (HH:MM)	
Priority	Low

#6 : Verify password masking functionality	
Author	Dinesh Saiwal
Summary	Ensure the characters entered in the Password field are masked for security.
Precondition	User is on the Powergear sign-in page.
Estimated exec. duration (HH:MM)	
Priority	Low
#7 : Verify login with case sensitivity in email and password	
Author	Dinesh Saiwal
Summary	Ensure the email and password fields are case-sensitive.
Precondition	User has valid email and password credentials stored in lowercase.User is on the Powergear sign-in page.
Estimated exec. duration (HH:MM)	
Priority	High
#8 : Verify behavior when only the email field is filled	

Author	Dinesh Saiwal
Summary	Ensure the system displays an error message when the email is provided, but the password field is blank.
Precondition	User is on the Powergear Sign In page.&nbsp;
Estimated exec. duration (HH:MM)	
Priority	Medium

#9 : Verify behavior when password format is invalid	
Author	Dinesh Saiwal
Summary	Ensure the system displays an error message when the password doesn't meet the format requirements.
Precondition	User is on the Powergear Sign In page.
Estimated exec. duration (HH:MM)	
Priority	Low

#10 : Verify behavior when login button is clicked without entering any field	
Author	Dinesh Saiwal
Summary	Ensure the system displays default error messages when no fields are entered, and the login button is clicked.

Precondition	User is on the Powergear Sign In page.
Estimated exec. duration (HH:MM)	
Priority	Low

### 1.1.1 Folder : Forgot Password

#11 : Verify the Forgot Password Link Navigation	
Author	Dinesh Saiwal
Summary	Ensure the 'Forgot Password?' link navigates the user to the password recovery page.
Precondition	User is on the Sign In page of the application.
Estimated exec. duration (HH:MM)	
Priority	High

#12 : Verify Error Message for Non-Registered Email	
Author	Dinesh Saiwal
Summary	Ensure that an error message is displayed when the user enters an email address that is not registered.
Precondition	User is on the Forgot Password page.

Estimated exec. duration (HH:MM)	
Priority	Medium

#13 : Verify Popup Message for Registered Email

Author	Dinesh Saiwal
Summary	Ensure a confirmation popup is displayed when a registered email address is entered.
Precondition	User is on the Forgot Password page.
Estimated exec. duration (HH:MM)	
Priority	High

#14 : Verify Password Reset Link in Email

Author	Dinesh Saiwal
Summary	Ensure the user receives a password reset link via email for a registered email address.
Precondition	The user has entered a valid registered email address on the Forgot Password page.
Estimated exec. duration (HH:MM)	

Priority	High
----------	------

#15 : Verify Navigation to Reset Password Page from Email Link

Author	Dinesh Saiwal
Summary	Ensure the user is navigated to the Reset Password page upon clicking the link in the reset email.
Precondition	User has received a valid password reset email.
Estimated exec. duration (HH:MM)	
Priority	High

#16 : Verify Password Validation on Reset Password Page

Author	Dinesh Saiwal
Summary	Ensure the new password meets the minimum requirements (8 characters, 1 uppercase, 1 lowercase, 1 special character, and 1 number).
Precondition	User is on the Reset Password page after clicking the reset link.
Estimated exec. duration (HH:MM)	
Priority	High

#17 : Verify Password Confirmation

Author	Dinesh Saiwal
Summary	Ensure the 'Confirm Password' field matches the 'New Password' field.
Precondition	User is on the Reset Password page after clicking the reset link.
Estimated exec. duration (HH:MM)	
Priority	High

#18 : Verify Successful Password Reset	
Author	Dinesh Saiwal
Summary	Ensure the user receives a success popup after successfully resetting the password.
Precondition	User has entered valid passwords in the 'New Password' and 'Confirm Password' fields on the Reset Password page.
Estimated exec. duration (HH:MM)	
Priority	High

#19 : Verify Navigation to Sign In Page After Password Reset	
Author	Dinesh Saiwal
Summary	Ensure the user is navigated to the Sign In page upon clicking the 'Proceed to Sign In' button in the success popup.

Precondition	User has successfully reset their password.
Estimated exec. duration (HH:MM)	
Priority	High

#20 : Verify Login with Updated Credentials	
Author	Dinesh Saiwal
Summary	Ensure the user can log in using the new credentials after successfully resetting their password.
Precondition	User has successfully reset their password.
Estimated exec. duration (HH:MM)	
Priority	High

#21 : Verify UI and Accessibility of Forgot Password Page	
Author	Dinesh Saiwal
Summary	Ensure the Forgot Password page adheres to UI/UX standards and accessibility requirements.
Precondition	User is on the Forgot Password page

Estimated exec. duration (HH:MM)	
Priority	Medium

#22 : Verify Behavior for Blank Email Submission	
Author	Dinesh Saiwal
Summary	Ensure an error message is displayed when the email field is left blank, and the 'Send Reset Link' button is clicked.
Precondition	User is on the Forgot Password page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#23 : Verify Handling of Invalid Email Format	
Author	Dinesh Saiwal
Summary	Ensure an error message is displayed for an improperly formatted email address.
Precondition	User is on the Forgot Password page
Estimated exec. duration (HH:MM)	
Priority	Medium

#24 : Verify Behavior for Incomplete Password Requirements	
Author	Dinesh Saiwal
Summary	Ensure appropriate error messages are displayed for passwords that do not meet all validation criteria (e.g., missing uppercase, lowercase, special character, or number).
Precondition	User is on the Reset Password page.
Estimated exec. duration (HH:MM)	
Priority	High

#25 : Verify Password Masking Behavior	
Author	Dinesh Saiwal
Summary	Ensure the password and confirm password fields are masked by default, with an option to toggle visibility.
Precondition	User is on the Reset Password page.
Estimated exec. duration (HH:MM)	
Priority	Low

#26 : Verify Behavior for Mismatched Password and Confirm Password Fields	
---	--

Author	Dinesh Saiwal
Summary	Ensure an error message is displayed if the 'New Password' and 'Confirm Password' fields do not match.
Precondition	User is on the Reset Password page.
Estimated exec. duration (HH:MM)	
Priority	High

## 1.2 Folder : Profile

#27 : Verify user can change profile details in Powergear application	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can successfully modify editable fields in the profile (Username, Work Email, Profile Photo) and save the changes.
Precondition	User must be logged in to the Powergear application with valid credentials.
Estimated exec. duration (HH:MM)	
Priority	High

#28 : Verify email validation for Work Email
--

Author	Dinesh Saiwal
Summary	This test case ensures that the Work Email field allows only valid email formats when edited.
Precondition	User must be logged in to the Powergear application with valid credentials.
Estimated exec. duration (HH:MM)	
Priority	High

#29 : Verify Profile Photo upload validation	
Author	Dinesh Saiwal
Summary	This test case checks that the Profile Photo field allows valid file types and adheres to size restrictions.
Precondition	User must be logged in to the Powergear application with valid credentials.
Estimated exec. duration (HH:MM)	
Priority	High

#30 : Verify uneditable fields in Profile page	
Author	Dinesh Saiwal
Summary	This test case ensures that the User ID and Role fields are not editable in the Profile page.

Precondition	User must be logged in to the Powergear application with valid credentials.
Estimated exec. duration (HH:MM)	
Priority	Medium

#31 : Verify "Save Changes" functionality after editing profile details	
Author	Dinesh Saiwal
Summary	This test case ensures that the "Save Changes" button successfully saves the updated profile details and displays a toast message.
Precondition	User must be logged in to the Powergear application with valid credentials and have edited at least one field in the profile.
Estimated exec. duration (HH:MM)	
Priority	High

#32 : Verify "Edit Profile" button functionality	
Author	Dinesh Saiwal
Summary	This test case ensures that the "Edit Profile" button is functional and allows the user to modify the editable fields in the profile.
Precondition	User must be logged in to the Powergear application with valid credentials and on the Profile page.

Estimated exec. duration (HH:MM)	
Priority	High

#33 : Verify toast message after saving profile changes	
Author	Dinesh Saiwal
Summary	This test case verifies that a toast message appears after successfully saving profile changes.
Precondition	User must be logged in to the Powergear application with valid credentials and have saved profile changes.
Estimated exec. duration (HH:MM)	
Priority	Medium

#34 : Verify the system behavior when the user cancels profile editing	
Author	Dinesh Saiwal
Summary	This test case ensures that when the user cancels profile editing, the changes are not saved and the profile returns to its original state.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page with editable fields.
Estimated exec. duration (HH:MM)	
Priority	Medium

#35 : Verify user can change the password in Powergear application	
Author	Dinesh Saiwal
Summary	This test case verifies that a user can successfully change their password by providing the current password, new password, and confirming the new password.
Precondition	User must be logged in to the Powergear application with valid credentials.
Estimated exec. duration (HH:MM)	
Priority	High

#36 : Verify password validation rules for the new password	
Author	Dinesh Saiwal
Summary	This test case ensures that the new password adheres to the required rules: minimum 8 characters, including uppercase, lowercase, a special character, and a number.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.
Estimated exec. duration (HH:MM)	
Priority	High

#37 : Verify user cannot set the new password same as the old password	
Author	Dinesh Saiwal
Summary	This test case ensures that the user cannot set the new password to the same value as the old password.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.
Estimated exec. duration (HH:MM)	
Priority	High

#38 : Verify "Change Password" button functionality	
Author	Dinesh Saiwal
Summary	This test case ensures that the "Change Password" button opens the correct popup with fields for Current Password, New Password, and Confirmed Password.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.
Estimated exec. duration (HH:MM)	
Priority	High

#39 : Verify successful password change after confirming new password	
Author	Dinesh Saiwal

Summary	This test case ensures that after entering the correct Current Password and a valid New Password, the password is changed successfully, and a confirmation toast message appears.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.
Estimated exec. duration (HH:MM)	
Priority	High

#40 : Verify error message for invalid current password	
Author	Dinesh Saiwal
Summary	This test case ensures that an error message is displayed if the user enters an incorrect current password while attempting to change the password.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#41 : Verify mismatch between new password and confirm password	
Author	Dinesh Saiwal
Summary	This test case ensures that an error message is displayed if the new password and confirm password fields do not match.

Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.
Estimated exec. duration (HH:MM)	
Priority	High

#42 : Verify password change cancel functionality	
Author	Dinesh Saiwal
Summary	This test case ensures that when the user clicks the "Cancel" button in the password change popup, the changes are discarded, and the user is returned to the Profile page without any modifications.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#43 : Verify toast message after unsuccessful password change	
Author	Dinesh Saiwal
Summary	This test case ensures that a proper error toast message is displayed if the password change fails due to incorrect details or validation issues.
Precondition	User must be logged in to the Powergear application with valid credentials and be on the Profile page.

Estimated exec. duration (HH:MM)	
Priority	Medium

#44 : Verify visibility of assigned tasks in the Task list

Author	Dinesh Saiwal
Summary	This test case ensures that the user can see all the tasks assigned to them in the Task list table on the Profile page.
Precondition	User must be logged in to the Powergear application with valid credentials and have assigned tasks.
Estimated exec. duration (HH:MM)	
Priority	High

#45 : Verify task columns are displayed correctly

Author	Dinesh Saiwal
Summary	This test case ensures that the columns (Task Id, Task Name, Proposal title, Due date) are displayed correctly in the Task list on the Profile page.
Precondition	This test case ensures that the columns (Task Id, Task Name, Proposal title, Due date) are displayed correctly in the Task list on the Profile page.

Estimated exec. duration (HH:MM)	
Priority	Medium

#46 : Verify navigation to the assigned task page by clicking on a task	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can click on any task in the Task list and is redirected to the assigned task page.
Precondition	User must be logged in to the Powergear application with valid credentials and have assigned tasks.
Estimated exec. duration (HH:MM)	
Priority	High

#47 : Verify task list is empty if no tasks are assigned	
Author	Dinesh Saiwal
Summary	This test case ensures that the Task list is empty or displays a message indicating no tasks are assigned when there are no tasks for the user.
Precondition	User must be logged in to the Powergear application with valid credentials and no assigned tasks
Estimated exec. duration (HH:MM)	

Priority	Medium
----------	--------

#486 : Verify Sorting by Task ID in Ascending Order	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can sort the Task List by Task ID in ascending order.
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available in the list with different Task IDs.
Estimated exec. duration (HH:MM)	
Priority	High

#487 : Verify Sorting by Task ID in Descending Order	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can sort the Task List by Task ID in descending order.
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available in the list with different Task IDs.
Estimated exec. duration (HH:MM)	
Priority	High

#488 : Verify Sorting by Task Name in Ascending Order	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can sort the Task List by Task Name in ascending alphabetical order.&nbsp;
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available in the list with different Task Names.
Estimated exec. duration (HH:MM)	
Priority	High

#489 : Verify Sorting by Task Name in Descending Order	
Author	Dinesh Saiwal
Summary	&nbsp;This test case verifies that the user can sort the Task List by Task Name in descending alphabetical order.
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available in the list with different Task Names.
Estimated exec. duration (HH:MM)	
Priority	High

#490 : Verify Sorting by Proposal Title in Ascending Order for Task list	
--	--

Author	Dinesh Saiwal
Summary	This test case verifies that the user can sort the Task List by Proposal Title in ascending alphabetical order.
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available with different Proposal Titles.
Estimated exec. duration (HH:MM)	
Priority	High

#491 : Verify Sorting by Proposal Title in Descending Order for task list	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can sort the Task List by Proposal Title in descending alphabetical order.&nbsp;
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available with different Proposal Titles.
Estimated exec. duration (HH:MM)	
Priority	High

#492 : Verify Sorting by Due Date in Ascending Order for Task List	
Author	Dinesh Saiwal

Summary	This test case verifies that the user can sort the Task List by Due Date in ascending order (earliest to latest).
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available with different Due Dates.
Estimated exec. duration (HH:MM)	
Priority	High

#493 : Verify Sorting by Due Date in Descending Order Task List	
Author	Dinesh Saiwal
Summary	&nbsp;This test case verifies that the user can sort the Task List by Due Date in descending order (latest to earliest).&nbsp;
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Multiple tasks are available with different Due Dates.
Estimated exec. duration (HH:MM)	
Priority	High

#494 : Verify Sorting Functionality When No Tasks Are Available	
Author	Dinesh Saiwal
Summary	This test case verifies that the sorting functionality works correctly when no tasks are available in the Task List.

Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.No tasks are assigned to the user.
Estimated exec. duration (HH:MM)	
Priority	High

#495 : Verify That Completed Tasks Are Not Visible in the Task List	
Author	Dinesh Saiwal
Summary	This test case verifies that completed tasks are automatically removed from the Task List and do not appear in the sorting results.&nbsp;
Precondition	User is logged into the Powergear application.User has navigated to the Task List inside the profile.Some tasks have been marked as completed.
Estimated exec. duration (HH:MM)	
Priority	High

### 1.3 Folder : Historical Proposal

#48 : Verify Upload Functionality for a Single Proposal	
Author	Dinesh Saiwal
Summary	Validate that users can successfully upload a single proposal with all required details and documents.

Precondition	User is logged in to the Powergear application.User is navigated to the Historical Proposal section
Estimated exec. duration (HH:MM)	
Priority	High

#49 : Verify Mandatory Fields in Single Proposal Upload	
Author	Dinesh Saiwal
Summary	Ensure that mandatory fields (Proposal Title, Client, Bid Status, Received Proposal, Submitted Proposal) must be filled/uploaded before proceeding.
Precondition	User is logged in to the Powergear application.User is on the single proposal upload page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#50 : Verify Document Upload Validation	
Author	Dinesh Saiwal
Summary	Validate that only supported file types (docx, pdf, xls) can be uploaded and mandatory documents (Received Proposal, Submitted Proposal) are enforced.
Precondition	User is on the single proposal upload page in the Historical Proposal section.

Estimated exec. duration (HH:MM)	
Priority	High

#51 : Verify Success Message After Proposal Upload	
Author	Dinesh Saiwal
Summary	Ensure that a success message is displayed after uploading a proposal successfully.
Precondition	User has filled in all required fields and uploaded necessary documents.
Estimated exec. duration (HH:MM)	
Priority	Medium

#52 : Verify Uploaded Proposal Appears in the Table	
Author	Dinesh Saiwal
Summary	Validate that the uploaded proposal is displayed in the table with accurate details such as Proposal ID, Title, Client, Due Date, Bid Status, and Tags.
Precondition	A proposal has been successfully uploaded.User is viewing the proposal table in the Historical Proposal section.

Estimated exec. duration (HH:MM)	
Priority	High

#53 : Verify Validation for Missing Proposal Title	
Author	Dinesh Saiwal
Summary	Ensure that an error message is displayed if the user tries to upload a proposal without providing the Proposal Title.
Precondition	User is on the single proposal upload page in the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#54 : Verify Validation for Missing Client Name	
Author	Dinesh Saiwal
Summary	Ensure that an error message is displayed if the user tries to upload a proposal without providing the Client name.
Precondition	User is on the single proposal upload page in the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#55 : Verify Validation for Missing Bid Status	
Author	Dinesh Saiwal
Summary	Validate that users cannot proceed without selecting a Bid Status from the dropdown.
Precondition	User is on the single proposal upload page in the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#56 : Verify Upload Behavior for Missing Mandatory Documents	
Author	Dinesh Saiwal
Summary	Ensure that an error message is displayed if mandatory documents (Received Proposal and Submitted Proposal) are not uploaded.
Precondition	User is on the single proposal upload page in the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#57 : Verify Support for Additional Tags	

Author	Dinesh Saiwal
Summary	Ensure that users can select one or more optional tags while uploading a proposal.
Precondition	User is on the single proposal upload page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#58 : Verify File Type Restriction for Supporting Documents	
Author	Dinesh Saiwal
Summary	Validate that only docx, pdf, or xls files are allowed for Supporting Documents and an error is displayed for invalid file types.
Precondition	User is uploading Supporting Documents.
Estimated exec. duration (HH:MM)	
Priority	High

#59 : Verify Cancel Button Functionality During Proposal Upload	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Cancel button during the upload process discards all unsaved inputs and returns the user to the previous page.

Precondition	User is on the single proposal upload page and has entered some details or uploaded files.
Estimated exec. duration (HH:MM)	
Priority	High

#60 : Verify Duplicate Proposal Upload Prevention	
Author	Dinesh Saiwal
Summary	Ensure that duplicate proposals with the same title and client cannot be uploaded.
Precondition	A proposal with the same title and client already exists in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#61 : Verify Pagination in Uploaded Proposals Table	
Author	Dinesh Saiwal
Summary	Validate that the uploaded proposals table supports pagination when the number of proposals exceeds the default row limit.
Precondition	Multiple proposals have been uploaded to exceed the default row limit.

Estimated exec. duration (HH:MM)	
Priority	High

#62 : Verify Success Message Display After Proposal Upload	
Author	Dinesh Saiwal
Summary	Ensure that a success message "Document Uploaded" is displayed after successfully uploading a proposal.
Precondition	User has filled in all mandatory fields and uploaded required documents.
Estimated exec. duration (HH:MM)	
Priority	Medium

#63 : Verify Handling of Large File Sizes During Proposal Upload	
Author	Dinesh Saiwal
Summary	Ensure that an appropriate error message is displayed when trying to upload files exceeding the allowed size limit.
Precondition	User is on the single proposal upload page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#64 : Verify Character Limit Validation for Proposal Title	
Author	Dinesh Saiwal
Summary	Ensure that the Proposal Title field enforces the maximum character limit and prevents users from entering more than allowed.
Precondition	User is filling out the Proposal Title field on the single proposal upload page.
Estimated exec. duration (HH:MM)	
Priority	Medium
#65 : Verify Character Limit Validation for Description Field	
Author	Dinesh Saiwal
Summary	Validate that the Description field enforces the maximum character limit.
Precondition	User is filling out the Description field on the single proposal upload page.
Estimated exec. duration (HH:MM)	
Priority	Medium
#66 : Verify sorting of Proposal Id column	

Author	Dinesh Saiwal
Summary	This test case ensures that the user can sort the Proposal Id column in ascending and descending order.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#67 : Verify sorting of Proposal Title column	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can sort the Proposal Title column in ascending and descending order.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#68 : Verify sorting of Client column	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can sort the Client column in ascending and descending order.

Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#69 : Verify sorting of Due Date column	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can sort the Due Date column in ascending and descending order.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#70 : Verify default sorting order of Proposal columns	
Author	Dinesh Saiwal
Summary	This test case ensures that the columns in the Historical Proposal section are sorted by default in the correct initial order (ascending or descending).
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.

Estimated exec. duration (HH:MM)	
Priority	Medium

#71 : Verify filter functionality using the Client field	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can filter proposals based on the Client field.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#72 : Verify filter functionality using the Tag field	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can filter proposals based on the Tag field.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#73 : Verify filter functionality using the Bid field	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can filter proposals based on the Bid field.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#74 : Verify filter functionality using the Status field	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can filter proposals based on the Status field.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#75 : Verify filter functionality using the Due Date field	

Author	Dinesh Saiwal
Summary	This test case ensures that the user can filter proposals based on the Due Date field.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#76 : Verify applying multiple filters simultaneously	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can apply multiple filters (e.g., Client, Tag, Bid, Status, Due Date) at the same time.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#77 : Verify filter functionality when no results match applied filters	
Author	Dinesh Saiwal
Summary	This test case ensures that the user is notified or sees an empty result when no proposals match the applied filters.

Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#78 : Verify reset functionality clears all applied filters	
Author	Dinesh Saiwal
Summary	This test case ensures that the reset button clears all applied filters and restores the default view.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#79 : Verify filter popup behavior when closing without applying	
Author	Dinesh Saiwal
Summary	This test case ensures that the filter popup closes without making any changes if the user clicks the close button or cancels the operation.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.

Estimated exec. duration (HH:MM)	
Priority	Medium

#80 : Verify search functionality using Proposal Id	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can search proposals based on the Proposal Id.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#81 : Verify search functionality using Proposal Title	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can search proposals based on the Proposal Title.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#82 : Verify search functionality using Client	
Author	Dinesh Saiwal
Summary	This test case ensures that the user can search proposals based on the Client field.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#83 : Verify search behavior when no results match the search query	
Author	Dinesh Saiwal
Summary	This test case ensures that the user is notified or sees an empty result when no proposals match the search query.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#84 : Verify search functionality with partial text matching	

Author	Dinesh Saiwal
Summary	This test case ensures that the search works with partial matching of text in the Proposal Id, Proposal Title, and Client fields.
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#85 : Verify case-insensitive search	
Author	Dinesh Saiwal
Summary	This test case ensures that the search functionality is case-insensitive, meaning the user can search using any case variation (e.g., lowercase, uppercase).
Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#86 : Verify handling of special characters in the search query	
Author	Dinesh Saiwal
Summary	This test case ensures that the search functionality handles special characters correctly and returns appropriate results.

Precondition	User must be logged in to the Powergear application with valid credentials and have access to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#87 : Verify default view is List view in Historical Proposal section	
Author	Dinesh Saiwal
Summary	This test case checks that the default view for the Historical Proposal section is set to List view when the user navigates to the section.
Precondition	The user has valid credentials and is logged into the Powergear application.The user is on the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#88 : Verify switching from List view to Grid view in Historical Proposal section	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can switch the view from List view to Grid view successfully.
Precondition	The user has valid credentials and is logged into the Powergear application.The user is on the Historical Proposal section in List view.

Estimated exec. duration (HH:MM)	
Priority	High

#89 : Verify switching from Grid view to List view in Historical Proposal section	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can switch the view from Grid view back to List view successfully.&nbsp;
Precondition	The user has valid credentials and is logged into the Powergear application.The user is on the Historical Proposal section in Grid view.
Estimated exec. duration (HH:MM)	
Priority	High

#90 : Verify grid view displays folder structure with proposal titles	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user switches to Grid view, they can see a folder structure with the proposal title displayed within it.
Precondition	The user has valid credentials and is logged into the Powergear application.The user is on the Historical Proposal section in Grid view.
Estimated exec. duration (HH:MM)	
Priority	Medium

#91 : Verify visibility of documents/files in the Proposal	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can view the documents/files of a proposal after navigating to the proposal details page.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the Historical Proposal section and is viewing a proposal that has documents/files uploaded.
Estimated exec. duration (HH:MM)	
Priority	High

#92 : Verify functionality of the "View" option for proposal documents/files	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user clicks the "View" icon of a document/file in the proposal, a popup is displayed to review the document.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files.
Estimated exec. duration (HH:MM)	
Priority	High

#93 : Verify functionality of the "Download" option for proposal documents/files	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user clicks the "Download" icon of a document/file in the proposal, the file gets downloaded successfully.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files.
Estimated exec. duration (HH:MM)	
Priority	High

#94 : Verify functionality of the "Delete" option for proposal documents/files	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user clicks the "Delete" icon for a document/file in the proposal, a confirmation popup is displayed asking for confirmation to delete the file.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files.
Estimated exec. duration (HH:MM)	
Priority	High

#95 : Verify file deletion after confirming the "Delete" action	
Author	Dinesh Saiwal
Summary	This test case verifies that after confirming the delete action in the confirmation popup, the file is deleted from the proposal.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files
Estimated exec. duration (HH:MM)	
Priority	High

#96 : Verify that user cannot delete a file without confirming the delete action	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user clicks the "Delete" option for a file and dismisses the confirmation popup, the file is not deleted.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files.
Estimated exec. duration (HH:MM)	
Priority	High

#97 : Verify that the user can see the document name and type in the file list	
--	--

Author	Dinesh Saiwal
Summary	This test case verifies that the document name and type (e.g., PDF, DOCX) are visible for each uploaded file in the proposal.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files.
Estimated exec. duration (HH:MM)	
Priority	Medium

#98 : Verify file is not deleted if the user cancels the confirmation in the popup

Author	Dinesh Saiwal
Summary	This test case verifies that if the user cancels the delete action in the confirmation popup, the file remains intact in the proposal.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files.
Estimated exec. duration (HH:MM)	
Priority	Medium

#99 : Verify that the file is opened in the view popup when clicked on the "View" icon

Author	Dinesh Saiwal
--------	---------------

Summary	This test case verifies that when the user clicks on the "View" icon, the file is displayed correctly in a review popup.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page that contains documents/files.
Estimated exec. duration (HH:MM)	
Priority	High

#100 : Verify the visibility of the "Upload" button inside the proposal	
Author	Dinesh Saiwal
Summary	This test case verifies that the "Upload" button is visible and accessible for the user to upload additional documents when viewing a proposal.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page.
Estimated exec. duration (HH:MM)	
Priority	High

#101 : Verify the upload popup opens when clicking on the "Upload" button	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user clicks on the "Upload" button, an upload popup is displayed where the user can select files.

Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page.
Estimated exec. duration (HH:MM)	
Priority	High

#102 : Verify the user can drag and drop files in the upload popup	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can drag and drop supported files (docx, pdf, xls) into the upload popup for uploading.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page and opened the upload popup.
Estimated exec. duration (HH:MM)	
Priority	High

#103 : Verify the user can select files to upload using the file picker	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can select files using the file picker in the upload popup for uploading supported files (docx, pdf, xls).
Precondition	

	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page and opened the upload popup.
Estimated exec. duration (HH:MM)	
Priority	High

#104 : Verify the file upload functionality after selecting a file	
Author	Dinesh Saiwal
Summary	This test case verifies that after selecting a file, the user can upload it by clicking on the "Upload" button in the upload popup.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page and opened the upload popup.
Estimated exec. duration (HH:MM)	
Priority	High

#105 : Verify that the file is uploaded successfully	
Author	Dinesh Saiwal
Summary	This test case verifies that after clicking the "Upload" button, the selected file is uploaded and visible in the proposal's document list.
Precondition	

	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page, opened the upload popup, and selected a valid file.
Estimated exec. duration (HH:MM)	
Priority	High

#106 : Verify the supported file types for upload	
Author	Dinesh Saiwal
Summary	This test case verifies that only supported file types (docx, pdf, xls) can be uploaded. Other unsupported file types should not be allowed.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page and opened the upload popup.
Estimated exec. duration (HH:MM)	
Priority	High

#107 : Verify that the user can cancel the file upload	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can cancel the file upload by clicking on the "Cancel" button in the upload popup, and the upload process is aborted.
Precondition	

	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page and opened the upload popup.
Estimated exec. duration (HH:MM)	
Priority	Medium

#108 : Verify error message when trying to upload unsupported file types	
Author	Dinesh Saiwal
Summary	This test case verifies that an error message is displayed when the user tries to upload an unsupported file type.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page and opened the upload popup.
Estimated exec. duration (HH:MM)	
Priority	High

#109 : Verify UI behavior when selecting multiple files for upload	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can select multiple files at once for upload, and they are processed individually.
Precondition	

	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page and opened the upload popup.
Estimated exec. duration (HH:MM)	
Priority	Medium

#110 : Verify the visibility of the file search box	
Author	Dinesh Saiwal
Summary	This test case verifies that the search box for searching files by name is visible and accessible inside the proposal details page.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page.
Estimated exec. duration (HH:MM)	
Priority	High

#111 : Verify the functionality of the file search box	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can type in the search box to search for files by their names within the proposal.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page with files uploaded.

Estimated exec. duration (HH:MM)	
Priority	High

#112 : Verify search returns matching files based on file name	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user types a file name in the search box, only the files matching the entered text appear in the results.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page with multiple files uploaded.
Estimated exec. duration (HH:MM)	
Priority	High

#113 : Verify search returns no results for non-matching file names	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user enters a file name that does not match any file, the system shows no results.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page with multiple files uploaded.

Estimated exec. duration (HH:MM)	
Priority	Medium

#114 : Verify partial match search for file names	
Author	Dinesh Saiwal
Summary	This test case verifies that the search box can return results for partial matches of file names.&nbsp;
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page with files uploaded.
Estimated exec. duration (HH:MM)	
Priority	High

#115 : Verify case-insensitive file name search	
Author	Dinesh Saiwal
Summary	This test case verifies that the search is case-insensitive, meaning the user can search for files regardless of whether the search term is in upper or lower case.&nbsp;
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page with files uploaded.

Estimated exec. duration (HH:MM)	
Priority	High

#116 : Verify search functionality with special characters in file names	
Author	Dinesh Saiwal
Summary	This test case verifies that the search box works correctly when file names contain special characters, ensuring they are properly matched.
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page with files uploaded.
Estimated exec. duration (HH:MM)	
Priority	High

#117 : Verify search box resets when cleared	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user clears the search box, all files are shown again.&nbsp;
Precondition	The user has valid credentials and is logged into the Powergear application.The user has navigated to the proposal details page with files uploaded.

Estimated exec. duration (HH:MM)	
Priority	Medium

#118 : Verify visibility of the "Edit" icon for proposals	
Author	Dinesh Saiwal
Summary	Ensure the "Edit" icon is visible for each proposal in the Historical Proposal section.
Precondition	User is logged into the Powergear application and has navigated to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#119 : Verify the "Edit Proposal" popup opens upon clicking the edit icon	
Author	Dinesh Saiwal
Summary	Ensure clicking on the "Edit" icon opens the "Edit Proposal" popup with editable fields and action buttons.
Precondition	User is logged into the Powergear application, navigated to the Historical Proposal section, and selected a proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#120 : Verify editable fields in the "Edit Proposal" popup	
Author	Dinesh Saiwal
Summary	Ensure Title, Due Date, Bid Status, Tags, and Client fields are editable in the popup.
Precondition	User is in the "Edit Proposal" popup.
Estimated exec. duration (HH:MM)	
Priority	High
#121 : Verify reset functionality clears edited fields	
Author	Dinesh Saiwal
Summary	Ensure clicking the reset button clears all changes made in the fields of the "Edit Proposal" popup.
Precondition	User is in the "Edit Proposal" popup and has made changes to fields.
Estimated exec. duration (HH:MM)	
Priority	Medium
#122 : Verify "Save Changes" functionality after editing a proposal	

Author	Dinesh Saiwal
Summary	Ensure that clicking the "Save Changes" button saves the edits and updates the proposal details.
Precondition	User is in the "Edit Proposal" popup and has made valid changes to the fields.
Estimated exec. duration (HH:MM)	
Priority	High

#123 : Verify success message after saving edits	
Author	Dinesh Saiwal
Summary	Ensure a success message is displayed after the user saves changes in the "Edit Proposal" popup.
Precondition	User is in the "Edit Proposal" popup and has clicked "Save Changes."
Estimated exec. duration (HH:MM)	
Priority	High

#124 : Verify the system behavior when canceling edits	
Author	Dinesh Saiwal
Summary	Ensure closing the "Edit Proposal" popup without saving retains the original proposal details.

Precondition	User is in the "Edit Proposal" popup and has made changes to the fields.
Estimated exec. duration (HH:MM)	
Priority	Medium

#125 : Verify field length validation for Title and Tags	
Author	Dinesh Saiwal
Summary	Ensure that Title and Tags fields adhere to length constraints and display errors for excessive input.
Precondition	User is in the "Edit Proposal" popup and enters long text in Title or Tags fields.
Estimated exec. duration (HH:MM)	
Priority	Medium

#126 : Verify date picker functionality for Due Date field	
Author	Dinesh Saiwal
Summary	Ensure the date picker for Due Date functions correctly and allows valid date selection.
Precondition	User is in the "Edit Proposal" popup.

Estimated exec. duration (HH:MM)	
Priority	High

#127 : Verify error message for duplicate proposal titles	
Author	Dinesh Saiwal
Summary	Ensure an error is displayed when attempting to save changes with a duplicate proposal title.
Precondition	User is in the "Edit Proposal" popup and enters an already existing title.
Estimated exec. duration (HH:MM)	
Priority	High

#128 : Verify the visibility of the "Download" icon for proposals	
Author	Dinesh Saiwal
Summary	Ensure the "Download" icon is visible for each proposal in the Historical Proposal section.
Precondition	User is logged into the Powergear application and has navigated to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#129 : Verify functionality of the "Download" option for proposals	
Author	Dinesh Saiwal
Summary	Ensure clicking the "Download" icon downloads the corresponding proposal file successfully.
Precondition	User is logged into the Powergear application and has navigated to the Historical Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#131 : Verify the delete confirmation popup appears on clicking "Delete"	
Author	Dinesh Saiwal
Summary	Ensure clicking the "Delete" icon displays a confirmation popup before deleting the proposal.
Precondition	User is in the Historical Proposal section and clicks the "Delete" icon for a proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#132 : Verify proposal deletion after confirming the "Delete" action	

Author	Dinesh Saiwal
Summary	Ensure confirming the delete action removes the selected proposal from the list successfully.
Precondition	User is in the delete confirmation popup and clicks "Confirm."
Estimated exec. duration (HH:MM)	
Priority	High

#133 : Verify that proposals are not deleted without confirming the delete action	
Author	Dinesh Saiwal
Summary	Ensure closing the delete confirmation popup without confirmation does not delete the proposal.
Precondition	User is in the delete confirmation popup and clicks "Cancel" or closes the popup.
Estimated exec. duration (HH:MM)	
Priority	High

#134 : Verify success message after successful proposal deletion	
Author	Dinesh Saiwal
Summary	Ensure a success message is displayed after a proposal is successfully deleted.

Precondition	User confirms the delete action in the delete confirmation popup.
Estimated exec. duration (HH:MM)	
Priority	Medium

## 1.4 Folder : User Management

#135 : Verify visibility of "Add User" button in User Management section	
Author	Dinesh Saiwal
Summary	Ensure that the "Add User" button is visible in the User Management section for Bid Manager role.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials.
Estimated exec. duration (HH:MM)	
Priority	High

#136 : Verify the "Add User" button functionality	
Author	Dinesh Saiwal
Summary	Ensure that clicking the "Add User" button opens the user creation popup with required fields
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.

Estimated exec. duration (HH:MM)	
Priority	High

#137 : Verify mandatory fields in the "Add User" popup

Author	Dinesh Saiwal
Summary	Ensure that the mandatory fields (Full Name, Work Email, Role) are present and required in the "Add User" popup.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#138 : Verify Work Email validation during user creation

Author	Dinesh Saiwal
Summary	Ensure that the Work Email field accepts only valid email addresses and shows an error for invalid formats.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.
Estimated exec. duration (HH:MM)	

Priority	High
#139 : Verify duplicate user validation when adding a new user	
Author	Dinesh Saiwal
Summary	Ensure that the application does not allow creating a new user with an already existing email address.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.r
Estimated exec. duration (HH:MM)	
Priority	High
#140 : Verify successful user creation	
Author	Dinesh Saiwal
Summary	Ensure that after filling in all required fields, clicking "Create User" successfully adds the new user and sends an invitation email.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials, navigate to the User Management section, and fill in the mandatory fields in the "Add User" popup.
Estimated exec. duration (HH:MM)	
Priority	High

#141 : Verify email invitation sent after user creation	
Author	Dinesh Saiwal
Summary	Ensure that after the successful creation of a user, an invitation email with credentials is sent to the new user's Work Email.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials, navigate to the User Management section, and successfully create a new user.
Estimated exec. duration (HH:MM)	
Priority	High

#142 : Verify Role dropdown functionality	
Author	Dinesh Saiwal
Summary	Ensure that the "Role" dropdown in the "Add User" popup allows selecting only "Bid Manager" or "Team Member."
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#143 : Verify "Create User" button functionality	
Author	Dinesh Saiwal

Summary	Ensure that clicking the "Create User" button after filling in the details correctly adds the user and displays a success message.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials, navigate to the User Management section, and fill out the required fields in the "Add User" popup.
Estimated exec. duration (HH:MM)	
Priority	High

#144 : Verify cancel button functionality in "Add User" popup	
Author	Dinesh Saiwal
Summary	Ensure that clicking the "Cancel" button in the "Add User" popup closes the form without saving any changes.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#145 : Verify field validation for "Full Name" in the "Add User" popup	
Author	Dinesh Saiwal
Summary	Ensure that the "Full Name" field is a mandatory text input and validates the input for non-empty values.

Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#146 : Verify the error message when the "Full Name" field is left empty	
Author	Dinesh Saiwal
Summary	Ensure that an error message is shown when the "Full Name" field is left empty upon attempting to create a new user.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#147 : Verify the error message when the "Work Email" field is left empty	
Author	Dinesh Saiwal
Summary	Ensure that an error message is shown when the "Work Email" field is left empty upon attempting to create a new user.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.

Estimated exec. duration (HH:MM)	
Priority	Medium

#148 : Verify user creation with both "Bid Manager" and "Team Member" roles	
Author	Dinesh Saiwal
Summary	Ensure that both roles ("Bid Manager" and "Team Member") are selectable in the Role dropdown, and the user is created with the selected role.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#149 : Verify user invitation sent to new user email address	
Author	Dinesh Saiwal
Summary	Ensure that once a new user is created, an email with login credentials is sent to the new user's Work Email address.
Precondition	Login to the Powergear application as a Bid Manager with valid credentials and create a new user.
Estimated exec. duration (HH:MM)	

Priority	High
----------	------

#150 : Verify Visibility of Edit Icon for Users	
Author	Dinesh Saiwal
Summary	Ensure the Edit icon is visible for each user in the User Management section.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#151 : Verify Edit Popup Opens Upon Clicking Edit Icon	
Author	Dinesh Saiwal
Summary	Ensure the Edit popup opens when the Bid Manager clicks on the Edit icon for a user.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#152 : Verify Editing Name and Role	
-------------------------------------	--

Author	Dinesh Saiwal
Summary	Ensure the Bid Manager can edit the user’s Full Name and Role in the Edit popup.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#153 : Verify Reset Button Resets Edited Fields	
Author	Dinesh Saiwal
Summary	Ensure the Reset button resets the edited fields to the original values in the Edit popup.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#154 : Verify Cancel Button Cancels Edits	
Author	Dinesh Saiwal
Summary	Ensure the Cancel button cancels the editing and does not save changes.

Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#155 : Verify Save Changes Button Saves Edits	
Author	Dinesh Saiwal
Summary	Ensure the Save Changes button saves the edited details of the user.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#156 : Verify Non-editable Work Email in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure the Work Email field is non-editable in the Edit User popup.&nbsp;
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.

Estimated exec. duration (HH:MM)	
Priority	Medium

#157 : Verify Edit User Saves Successfully	
Author	Dinesh Saiwal
Summary	Ensure that the changes made to a user (name and role) are saved and reflected in the User Management section.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#158 : Verify Role Can Be Edited for Existing Users	
Author	Dinesh Saiwal
Summary	Ensure that the Role of an existing user can be updated from Bid Manager to Team Member or vice versa.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#159 : Verify the Visibility of Filter Button in User Management Section	
Author	Dinesh Saiwal
Summary	Ensure the Filter button is visible and accessible in the User Management section.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High
#160 : Verify Filter Popup Opens Upon Clicking the Filter Button	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Filter button opens the filter popup with the Role and Working on dropdown fields.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High
#161 : Verify Role Dropdown Functionality in Filter Popup	

Author	Dinesh Saiwal
Summary	Ensure the Role dropdown in the filter popup displays both available options and supports multi-select.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#162 : Verify "Working On" Dropdown Functionality in Filter Popup	
Author	Dinesh Saiwal
Summary	Ensure the Working on dropdown in the filter popup displays available options and supports multi-select.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#163 : Verify User Filtering by Role	
Author	Dinesh Saiwal
Summary	Ensure the user list can be filtered by selecting one or multiple roles (e.g., Bid Manager or Team Member) in the filter popup.

Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#164 : Verify User Filtering by "Working On"	
Author	Dinesh Saiwal
Summary	Ensure the user list can be filtered based on the Working on field selection in the filter popup.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#165 : Verify User Filtering with Multiple Selections in Role Dropdown	
Author	Dinesh Saiwal
Summary	Ensure that selecting multiple roles (e.g., both Bid Manager and Team Member) in the Role dropdown filters the user list accordingly.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.

Estimated exec. duration (HH:MM)	
Priority	High

#166 : Verify User Filtering with Multiple Selections in "Working On" Dropdown	
Author	Dinesh Saiwal
Summary	Ensure that selecting multiple options in the Working on dropdown filters the user list accordingly.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#167 : Verify Reset Functionality Clears All Filter Selections	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Reset button in the filter popup clears all selected filters and resets the user list to show all users.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#168 : Verify Filter Popup Closes After Clicking Apply Button	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Apply button in the filter popup applies the selected filters and closes the popup, displaying the filtered user list.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#169 : Verify Filter Behavior When No Results Match	
Author	Dinesh Saiwal
Summary	Ensure that the user list displays a "No results found" message when no users match the selected filter criteria.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#170 : Verify User Can Clear All Filters After Applying	

Author	Dinesh Saiwal
Summary	Ensure that the user can clear all filters by clicking the Reset button after applying filters, showing the full user list again.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#171 : Verify Visibility of Search Box in User Management Section	
Author	Dinesh Saiwal
Summary	Ensure the Search box is visible and accessible in the User Management section.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#172 : Verify User Can Search by UserID	
Author	Dinesh Saiwal
Summary	Ensure the user can search for an existing user by UserID in the search box.

Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#173 : Verify User Can Search by Username	
Author	Dinesh Saiwal
Summary	Ensure the user can search for an existing user by Username in the search box.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#174 : Verify User Can Search by Email	
Author	Dinesh Saiwal
Summary	Ensure the user can search for an existing user by Email in the search box.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.

Estimated exec. duration (HH:MM)	
Priority	High

#175 : Verify User Can Search by Role	
Author	Dinesh Saiwal
Summary	Ensure the user can search for an existing user by Role (Bid Manager, Team Member) in the search box.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#176 : Verify User Can Search by "Working On" Field	
Author	Dinesh Saiwal
Summary	Ensure the user can search for an existing user by the Working On field in the search box.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#177 : Verify Partial Match Search for UserID	
Author	Dinesh Saiwal
Summary	Ensure that searching for part of a UserID returns matching users.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High
#178 : Verify Partial Match Search for Username	
Author	Dinesh Saiwal
Summary	Ensure that searching for part of a Username returns matching users.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High
#179 : Verify Partial Match Search for Email	

Author	Dinesh Saiwal
Summary	Ensure that searching for part of an Email returns matching users.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#180 : Verify No Results Found When No User Matches Search Criteria	
Author	Dinesh Saiwal
Summary	Ensure that if no users match the search criteria, a message like "No results found" is displayed.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#181 : Verify Sorting by UserID Column	
Author	Dinesh Saiwal
Summary	Ensure the UserID column can be sorted in ascending and descending order in the User Management section.

Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#182 : Verify Sorting by Username Column	
Author	Dinesh Saiwal
Summary	Ensure the Username column can be sorted in ascending and descending order in the User Management section.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#183 : Verify Sorting by Email Column	
Author	Dinesh Saiwal
Summary	Ensure the Email column can be sorted in ascending and descending order in the User Management section.
Precondition	Login to the Powergear application as a Bid Manager and navigate to the User Management section.

Estimated exec. duration (HH:MM)	
Priority	High

#184 : Verify Visibility of Delete Icon for Users	
Author	Dinesh Saiwal
Summary	Check if the delete icon is visible for each user in the User Management section.
Precondition	User must be logged in as a bid manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#185 : Verify Delete Confirmation Popup on Clicking Delete Icon	
Author	Dinesh Saiwal
Summary	Ensure that a confirmation popup appears when the delete icon is clicked.
Precondition	User must be logged in as a bid manager and navigate to the User Management section.
Estimated exec. duration (HH:MM)	
Priority	High

#186 : Verify User Is Not Deleted If the Delete Action Is Not Confirmed	
Author	Dinesh Saiwal
Summary	Ensure that no user is deleted if the delete action is canceled from the confirmation popup.
Precondition	User must be logged in as a bid manager and a confirmation popup should appear when clicking the delete icon.
Estimated exec. duration (HH:MM)	
Priority	Medium

#187 : Verify Success Message After Successful User Deletion	
Author	Dinesh Saiwal
Summary	Check if a success message is displayed after a user is deleted successfully.
Precondition	User must be logged in as a bid manager and a user must be deleted.
Estimated exec. duration (HH:MM)	
Priority	High

#188 : Verify Visibility of the User After Cancelling the Delete Action	

Author	Dinesh Saiwal
Summary	Ensure that the user remains visible in the user list if the delete action is canceled
Precondition	User must be logged in as a bid manager, and the delete confirmation popup should appear when clicking the delete icon.
Estimated exec. duration (HH:MM)	
Priority	High

## 1.5 Folder : New Proposals

#189 : Verify Visibility of "Upload File" window	
Author	Dinesh Saiwal
Summary	Ensure the "Upload File" button is visible in the New Proposal section.
Precondition	User is logged into the Powergear application as a Bid Manager and is on the New Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#190 : Verify Accepted File Types for Upload	
Author	Dinesh Saiwal

Summary	Confirm that only .docx and .pdf files are accepted for upload.
Precondition	User is logged into the Powergear application as a Bid Manager and is on the New Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#191 : Verify Error Message for Unsupported File Types	
Author	Dinesh Saiwal
Summary	Ensure the user sees an error message when trying to upload unsupported file types.
Precondition	User is logged into the Powergear application as a Bid Manager and is on the New Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#192 : Verify File Upload Functionality	
Author	Dinesh Saiwal
Summary	Validate that the user can successfully upload a .docx or .pdf file.
Precondition	User is logged into the Powergear application as a Bid Manager and is on the New Proposal section.

Estimated exec. duration (HH:MM)	
Priority	High

#193 : Verify ML Model Processes Uploaded File

Author	Dinesh Saiwal
Summary	Confirm that the ML model processes the uploaded document and displays results.
Precondition	A valid .docx or .pdf file is uploaded.
Estimated exec. duration (HH:MM)	
Priority	High

#194 : Verify Display of Similar Proposals

Author	Dinesh Saiwal
Summary	Ensure similar proposals, if available, are displayed in a table with a "View" button and win probability percentage.
Precondition	A valid .docx or .pdf file is uploaded, and similar proposals exist.
Estimated exec. duration (HH:MM)	

Priority	High
----------	------

#195 : Verify "View" Button Functionality	
Author	Dinesh Saiwal
Summary	Validate that clicking the "View" button opens the selected similar proposal.
Precondition	Similar proposals are displayed in the table after upload.
Estimated exec. duration (HH:MM)	
Priority	High

#196 : Verify No Data for Non-matching Proposals	
Author	Dinesh Saiwal
Summary	Ensure the table displays "No data" and win probability is 0% when no similar proposals exist.
Precondition	A valid .docx or .pdf file is uploaded, and no similar proposals are found.
Estimated exec. duration (HH:MM)	
Priority	High

#197 : Verify "Draft Proposal" Button Functionality	
---	--

Author	Dinesh Saiwal
Summary	Validate that the "Draft Proposal" button is enabled after the file is uploaded and processed.
Precondition	A valid .docx or .pdf file is successfully uploaded and processed.
Estimated exec. duration (HH:MM)	
Priority	High

#198 : Verify Maximum File Size Limit for Upload	
Author	Dinesh Saiwal
Summary	Confirm that the system enforces a maximum file size limit for uploads and displays an error for oversized files.
Precondition	User is logged into the Powergear application as a Bid Manager and is on the New Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#199 : Verify Loading Indicator During ML Model Processing	
Author	Dinesh Saiwal
Summary	Ensure a loading indicator or progress bar is displayed while the ML model processes the uploaded file.

Precondition	A valid .docx or .pdf file is uploaded.
Estimated exec. duration (HH:MM)	
Priority	Medium

#263 : Verify Visibility of Sort Icons for Proposal ID, Proposal Title, and Similarity Score Columns	
Author	Dinesh Saiwal
Summary	Ensure that sort icons are visible for the Proposal ID, Proposal Title, and Similarity Score columns in the table.
Precondition	User is logged in to the Powergear application with valid credentials and has navigated to the New Proposal section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#264 : Verify Sorting by Proposal ID Column in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure that the Proposal ID column can be sorted in ascending order.
Precondition	User is logged in to the Powergear application and navigates to the New Proposal section with similar proposal data displayed.

Estimated exec. duration (HH:MM)	
Priority	High

#265 : Verify Sorting by Proposal ID Column in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure that the Proposal ID column can be sorted in descending order.
Precondition	User is logged in to the Powergear application and navigates to the New Proposal section with similar proposal data displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#266 : Verify Sorting by Proposal Title Column in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure that the Proposal Title column can be sorted alphabetically in ascending order.
Precondition	User is logged in to the Powergear application and navigates to the New Proposal section with similar proposal data displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#267 : Verify Sorting by Proposal Title Column in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure that the Proposal Title column can be sorted alphabetically in descending order.
Precondition	User is logged in to the Powergear application and navigates to the New Proposal section with similar proposal data displayed.
Estimated exec. duration (HH:MM)	
Priority	High
#268 : Verify Sorting by Similarity Score Column in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure that the Similarity Score column can be sorted in ascending numerical order.
Precondition	User is logged in to the Powergear application and navigates to the New Proposal section with similar proposal data displayed.
Estimated exec. duration (HH:MM)	
Priority	High
#269 : Verify Sorting by Similarity Score Column in Descending Order	

Author	Dinesh Saiwal
Summary	Ensure that the Similarity Score column can be sorted in descending numerical order.
Precondition	User is logged in to the Powergear application and navigates to the New Proposal section with similar proposal data displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#270 : Verify Default Sorting Order on Page Load	
Author	Dinesh Saiwal
Summary	Ensure that the table is displayed with a default sorting order when the page is loaded.
Precondition	User is logged in to the Powergear application and navigates to the New Proposal section.
Estimated exec. duration (HH:MM)	
Priority	High

#271 : Verify Visibility of "Draft Proposal" Button	
Author	Dinesh Saiwal
Summary	Ensure the "Draft Proposal" button is visible after uploading a proposal in the New Proposal section.

Precondition	User is logged in to the Powergear application with valid credentials, navigated to the New Proposal section, and uploaded a proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#272 : Verify Navigation to Proposal Overview Page on Clicking "Draft Proposal"	
Author	Dinesh Saiwal
Summary	Ensure the user navigates to the Proposal Overview page upon clicking the "Draft Proposal" button.
Precondition	User has uploaded a proposal and the "Draft Proposal" button is visible.
Estimated exec. duration (HH:MM)	
Priority	High

#273 : Verify Default Proposal Structure on Proposal Overview Page	
Author	Dinesh Saiwal
Summary	Ensure the Proposal Overview page displays a default proposal structure/format after navigation.
Precondition	User has navigated to the Proposal Overview page by clicking the "Draft Proposal" button.

Estimated exec. duration (HH:MM)	
Priority	High

#274 : Verify Editing an Existing Section in Proposal Structure	
Author	Dinesh Saiwal
Summary	Ensure the user can edit the content of existing sections in the default proposal structure.
Precondition	User is on the Proposal Overview page with the default proposal structure visible.
Estimated exec. duration (HH:MM)	
Priority	High

#275 : Verify Adding a New Section to Proposal Structure	
Author	Dinesh Saiwal
Summary	Ensure the user can add a new section to the proposal structure.
Precondition	User is on the Proposal Overview page with the default proposal structure visible.
Estimated exec. duration (HH:MM)	
Priority	High

#276 : Verify Adding a Subsection Under a Main Section	
Author	Dinesh Saiwal
Summary	Ensure the user can add a subsection under an existing main section in the proposal structure.
Precondition	User is on the Proposal Overview page with the default proposal structure visible.
Estimated exec. duration (HH:MM)	
Priority	High

#277 : Verify Removing an Existing Section from Proposal Structure	
Author	Dinesh Saiwal
Summary	Ensure the user can remove an existing section from the proposal structure.
Precondition	User is on the Proposal Overview page with the default proposal structure visible.
Estimated exec. duration (HH:MM)	
Priority	High

#278 : Verify Validation for Empty Section Names	

Author	Dinesh Saiwal
Summary	Ensure the system validates and prevents saving empty section names.
Precondition	User is on the Proposal Overview page and is editing or adding sections.
Estimated exec. duration (HH:MM)	
Priority	High

#279 : Verify Visibility of "Generate Proposal with AI" Button	
Author	Dinesh Saiwal
Summary	Ensure the "Generate Proposal with AI" button is visible after drafting the proposal structure.
Precondition	User is logged in to the Powergear application, has uploaded a proposal, and created the proposal structure.
Estimated exec. duration (HH:MM)	
Priority	High

#280 : Verify AI Generates Description for All Sections and Subsections	
Author	Dinesh Saiwal
Summary	Ensure clicking the "Generate Proposal with AI" button triggers the generation of descriptions for all sections and subsections.

Precondition	User has drafted the proposal structure and is on the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	High

#281 : Verify AI-Generated Descriptions Are Displayed for Sections	
Author	Dinesh Saiwal
Summary	Ensure that the AI-generated descriptions for each section and subsection are displayed correctly in the Proposal Overview.
Precondition	User has clicked the "Generate Proposal with AI" button and the AI has processed the data.
Estimated exec. duration (HH:MM)	
Priority	High

#283 : Verify AI-Generated Description Accuracy	
Author	Dinesh Saiwal
Summary	Ensure that the AI-generated descriptions are relevant and accurately reflect the content of each section and subsection.
Precondition	User has clicked the "Generate Proposal with AI" button and is reviewing the generated descriptions.

Estimated exec. duration (HH:MM)	
Priority	High

#284 : Verify Enlarge Icon Functionality for Preview	
Author	Dinesh Saiwal
Summary	Ensure the enlarge icon works correctly to expand the entire preview section for a detailed view.
Precondition	User is on the Proposal Overview page with AI-generated descriptions.
Estimated exec. duration (HH:MM)	
Priority	High

#285 : Verify Visibility of "Unassigned (+)" Icon for Sections and Subsections	
Author	Dinesh Saiwal
Summary	Ensure the "Unassigned (+)" icon is visible next to sections and subsections in the Proposal Overview.
Precondition	User is logged in to the Powergear application, uploaded a proposal, and is on the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	High

#286 : Verify "Assign Section" Popup Opens on Clicking "Unassigned (+)" Icon	
Author	Dinesh Saiwal
Summary	Ensure that clicking the "Unassigned (+)" icon opens a popup with fields for assignee, reviewer, and due dates.
Precondition	User is on the Proposal Overview page with sections and subsections displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#287 : Verify Assignee Dropdown Displays Available Team Members	
Author	Dinesh Saiwal
Summary	Ensure the "Assignee" dropdown in the popup lists all available team members.
Precondition	User has opened the "Assign Section" popup from the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	High

#288 : Verify Reviewer Dropdown Displays Available Bid Managers	

Author	Dinesh Saiwal
Summary	Ensure the "Reviewer" dropdown in the popup lists all available Bid Managers.
Precondition	User has opened the "Assign Section" popup from the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	High

#289 : Verify Mandatory fields	
Author	Dinesh Saiwal
Summary	Ensure that the system displays a validation error if any mandatory field is left empty.
Precondition	User has opened the "Assign Section" popup from the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#290 : Verify Due Date Fields Accept Valid Dates	
Author	Dinesh Saiwal
Summary	Ensure that the "Assignee Due Date" and "Reviewer Due Date" fields accept valid calendar inputs.

Precondition	User has opened the "Assign Section" popup from the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	Medium

#291 : Verify Successful Assignment of Section with Assignee and Reviewer	
Author	Dinesh Saiwal
Summary	Ensure that a section is successfully assigned after filling all required fields and clicking the "Assign Section" button.
Precondition	User has completed the fields in the "Assign Section" popup.
Estimated exec. duration (HH:MM)	
Priority	High

#292 : Verify Status Changes to "Unanswered" After Section is Assigned	
Author	Dinesh Saiwal
Summary	Ensure that the status of the assigned section or subsection changes to "Unanswered" after assignment.
Precondition	User has successfully assigned a section or subsection.

Estimated exec. duration (HH:MM)	
Priority	High

#293 : Verify Cancel Button Closes the "Assign Section" Popup Without Changes	
Author	Dinesh Saiwal
Summary	Ensure that clicking the "Cancel" button closes the popup without assigning the section or changing any data.
Precondition	User has opened the "Assign Section" popup from the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	High

#294 : Verify Error Message for Past Dates in Due Date Fields	
Author	Dinesh Saiwal
Summary	Ensure that the system displays an error if the assignee or reviewer due date is set to a past date.
Precondition	User has opened the "Assign Section" popup and is attempting to set a past date in the due date fields.
Estimated exec. duration (HH:MM)	
Priority	High

#295 : Verify Multiple Sections and Subsections Can Be Assigned Independently	
Author	Dinesh Saiwal
Summary	Ensure that multiple sections and subsections can be assigned to different team members and reviewers.
Precondition	User is on the Proposal Overview page with multiple sections and subsections displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#296 : Verify Visibility of Start Date and End Date Fields	
Author	Dinesh Saiwal
Summary	Ensure that the fields for setting the start date and end date of the proposal are visible on the Proposal Overview page.
Precondition	User is logged in to the Powergear application and has navigated to the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	High

#297 : Verify Start Date Field Accepts Valid Dates	

Author	Dinesh Saiwal
Summary	Ensure that the start date field accepts valid calendar inputs.
Precondition	User is on the Proposal Overview page with access to the start date field.
Estimated exec. duration (HH:MM)	
Priority	High

#298 : Verify End Date Field Accepts Valid Dates	
Author	Dinesh Saiwal
Summary	Ensure that the end date field accepts valid calendar inputs.
Precondition	User is on the Proposal Overview page with access to the end date field.
Estimated exec. duration (HH:MM)	
Priority	High

#299 : Verify Start Date Cannot Be Set in the Past	
Author	Dinesh Saiwal
Summary	Ensure that the system prevents the user from selecting a start date that is earlier than the current date.

Precondition	User is on the Proposal Overview page with access to the start date field.
Estimated exec. duration (HH:MM)	
Priority	High

#300 : Verify End Date Cannot Be Earlier Than Start Date	
Author	Dinesh Saiwal
Summary	Ensure that the system prevents the user from setting the end date earlier than the start date.
Precondition	User is on the Proposal Overview page with both start date and end date fields accessible.
Estimated exec. duration (HH:MM)	
Priority	High

#301 : Verify Error Message for Invalid Date Ranges	
Author	Dinesh Saiwal
Summary	Ensure that the system displays an error message when invalid date ranges are entered (e.g., end date earlier than start date).
Precondition	User is on the Proposal Overview page and enters invalid date ranges.

Estimated exec. duration (HH:MM)	
Priority	High

#302 : Verify Visibility of Comment Icon for Sections and Subsections	
Author	Dinesh Saiwal
Summary	Ensure the comment icon is visible for all sections and subsections in the Proposal Overview.
Precondition	User is logged in to the Powergear application and is on the Proposal Overview page.
Estimated exec. duration (HH:MM)	
Priority	High

#303 : Verify Existing Comments Are Displayed on Clicking Comment Icon	
Author	Dinesh Saiwal
Summary	Ensure that clicking the comment icon displays all existing comments for the selected section or subsection.
Precondition	User is on the Proposal Overview page, and the section/subsection has comments added previously.
Estimated exec. duration (HH:MM)	
Priority	High

#304 : Verify User Can Add a New Comment to a Section or Subsection	
Author	Dinesh Saiwal
Summary	Ensure that the user can add a new comment to the selected section or subsection.
Precondition	User is on the Proposal Overview page and clicks the comment icon for a section or subsection.
Estimated exec. duration (HH:MM)	
Priority	High

#305 : Verify Tagging a User in Comments	
Author	Dinesh Saiwal
Summary	Ensure that the user can tag another user in the comments using the tagging feature (e.g., @username).
Precondition	User is on the Proposal Overview page, has clicked the comment icon, and is adding a comment.
Estimated exec. duration (HH:MM)	
Priority	High

#306 : Verify Saving a New Comment with a Tagged User	

Author	Dinesh Saiwal
Summary	Ensure that a comment with a tagged user can be saved successfully.
Precondition	User is on the Proposal Overview page, adding a comment with a tagged user.
Estimated exec. duration (HH:MM)	
Priority	High

#307 : Verify Notifications for Tagged Users	
Author	Dinesh Saiwal
Summary	Ensure that tagged users receive a notification or alert about being tagged in a comment.
Precondition	User is on the Proposal Overview page and tags another user in a comment.
Estimated exec. duration (HH:MM)	
Priority	High

#308 : Verify Display of Timestamp for Comments	
Author	Dinesh Saiwal
Summary	Ensure that each comment displays the timestamp of when it was added.

Precondition	User has added comments to a section or subsection.
Estimated exec. duration (HH:MM)	
Priority	High

#309 : Verify Comment Count Updates on Adding/Deleting Comments	
Author	Dinesh Saiwal
Summary	Ensure that the comment count shown on the comment icon updates correctly when comments are added or deleted.
Precondition	User is on the Proposal Overview page and interacts with the comments feature.
Estimated exec. duration (HH:MM)	
Priority	High

#310 : Verify Visibility of Delete Icon for Sections and Subsections	
Author	Dinesh Saiwal
Summary	Ensure the delete icon is visible for all sections and subsections in the Proposal Overview.
Precondition	User is logged in to the Powergear application and is on the Proposal Overview page.

Estimated exec. duration (HH:MM)	
Priority	High

#311 : Verify Alert Popup on Clicking Delete Icon	
Author	Dinesh Saiwal
Summary	Ensure that clicking the delete icon displays an alert popup asking the user to confirm the deletion action.
Precondition	User is on the Proposal Overview page and clicks the delete icon for a section or subsection.
Estimated exec. duration (HH:MM)	
Priority	High

#312 : Verify Canceling the Deletion Action Retains the Section/Subsection	
Author	Dinesh Saiwal
Summary	Ensure that clicking "Cancel" or "No" in the alert popup does not delete the section or subsection.
Precondition	User has clicked the delete icon and is viewing the alert popup.
Estimated exec. duration (HH:MM)	
Priority	High

#313 : Verify Successful Deletion of Section/Subsection	
Author	Dinesh Saiwal
Summary	Ensure that clicking "Confirm" or "Yes" in the alert popup successfully deletes the section or subsection.
Precondition	User has clicked the delete icon and confirmed the deletion action in the alert popup.
Estimated exec. duration (HH:MM)	
Priority	High

#314 : Verify Visibility of "Proposal Participants" Section	
Author	Dinesh Saiwal
Summary	Ensure the Proposal Participants section is visible on the Proposal Drafting page.
Precondition	User is logged in to the Powergear application and is on the Proposal Drafting page.
Estimated exec. duration (HH:MM)	
Priority	High

#315 : Verify Visibility of "Add" Button in Proposal Participants Section	

Author	Dinesh Saiwal
Summary	Ensure the Add button is visible in the Proposal Participants section.
Precondition	User is on the Proposal Drafting page and can view the Proposal Participants section.
Estimated exec. duration (HH:MM)	
Priority	High

#316 : Verify Add Participants Popup Opens on Clicking "Add" Button	
Author	Dinesh Saiwal
Summary	Ensure clicking the Add button opens a popup with the option to select users from a dropdown.
Precondition	User is on the Proposal Drafting page and clicks the Add button in the Proposal Participants section.
Estimated exec. duration (HH:MM)	
Priority	High

#317 : Verify Dropdown Lists Available Users for Selection	
Author	Dinesh Saiwal
Summary	Ensure the dropdown in the popup lists all available users for selection.

Precondition	User is on the Proposal Drafting page and the Add Participants popup is open.
Estimated exec. duration (HH:MM)	
Priority	High

#318 : Verify Selecting Multiple Users in the Dropdown	
Author	Dinesh Saiwal
Summary	Ensure that multiple users can be selected from the dropdown in the Add Participants popup.&nbsp;
Precondition	User has opened the Add Participants popup.
Estimated exec. duration (HH:MM)	
Priority	High

#319 : Verify Adding Selected Users to Proposal Participants List	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure that the selected users are added to the Proposal Participants list after clicking the Add Member button.&nbsp;
Precondition	User has selected one or more users in the Add Participants popup.

Estimated exec. duration (HH:MM)	
Priority	High

#320 : Verify Cancel Button Closes the Add Participants Popup Without Changes	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Cancel button in the popup closes it without adding any users.
Precondition	User has opened the Add Participants popup.
Estimated exec. duration (HH:MM)	
Priority	High

#321 : Verify Updated Proposal Participants List After Adding Members	
Author	Dinesh Saiwal
Summary	Ensure the Proposal Participants list updates correctly to show the newly added users.
Precondition	User has added new participants through the Add Participants popup.
Estimated exec. duration (HH:MM)	
Priority	High

#322 : Verify Visibility of Resource Bank Section	
Author	Dinesh Saiwal
Summary	Ensure the Resource Bank section is visible on the Proposal Drafting page, allowing users to manage supporting documents.
Precondition	User is logged in to the Powergear application and is on the Proposal Drafting page.
Estimated exec. duration (HH:MM)	
Priority	High

#323 : verify Visibility of "+ Add Documents" Button	
Author	Dinesh Saiwal
Summary	Ensure the "+ Add Documents" button is visible in the Resource Bank section.
Precondition	User is on the Proposal Drafting page and can view the Resource Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#324 : Verify Upload Popup Opens on Clicking "+ Add Documents" Button	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure that clicking the "+ Add Documents" button opens an upload popup.
Precondition	User is on the Proposal Drafting page and clicks the "+ Add Documents" button.
Estimated exec. duration (HH:MM)	
Priority	High

#325 : Verify Supported File Formats for Upload	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure the system accepts only .pdf, .docx, and .xls file formats for uploading.&nbsp;
Precondition	User has opened the upload popup in the Resource Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#326 : Verify Drag and Drop Functionality for Uploading Documents	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure that users can drag and drop files into the upload popup.&nbsp;

Precondition	User is on the upload popup in the Resource Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#327 : Verify File Selection from Local Storage for supporting document	
Author	Dinesh Saiwal
Summary	Ensure that users can select files from their local storage for uploading.
Precondition	User is on the upload popup in the Resource Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#328 : Verify Successful Upload Adds Document to Supporting Documents Section	
Author	Dinesh Saiwal
Summary	Ensure that a successfully uploaded document is added to the Supporting Documents section.
Precondition	User has uploaded a file through the upload popup.

Estimated exec. duration (HH:MM)	
Priority	High

#329 : Verify Cancel Button in Upload Popup of supporting document	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Cancel button in the upload popup closes it without uploading the document.
Precondition	User has opened the upload popup in the Resource Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#330 : Verify Removing a Supporting Document	
Author	Dinesh Saiwal
Summary	Ensure that users can remove a document from the Supporting Documents section.
Precondition	User has successfully uploaded a document to the Supporting Documents section.
Estimated exec. duration (HH:MM)	
Priority	High

#331 : Verify Preview Functionality for Supporting Documents	
Author	Dinesh Saiwal
Summary	Ensure that clicking the View option for a supporting document opens a preview popup.
Precondition	User has successfully uploaded a document to the Supporting Documents section.
Estimated exec. duration (HH:MM)	
Priority	High

#332 : Verify Visibility of Similar Proposals in Resource Bank Section	
Author	Dinesh Saiwal
Summary	Ensure that similar proposals with matching percentage are displayed in the Resource Bank section.
Precondition	User is logged in and has uploaded a proposal in the Resource Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#333 : Verify Matching Percentage Display for Similar Proposals	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure that the matching percentage for similar proposals is displayed next to each proposal in the Resource Bank section.&nbsp;
Precondition	User is on the Resource Bank section and similar proposals are available.
Estimated exec. duration (HH:MM)	
Priority	High

#334 : Verify Visibility of Three Dots for Each Similar Proposal	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that the three dots (menu) icon is visible next to each similar proposal.&nbsp;
Precondition	User is on the Resource Bank section and similar proposals are displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#335 : Verify "View" Option in the Three Dots Menu for Similar Proposals	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that the "View" option is available when clicking on the three dots icon for a similar proposal.&nbsp;&nbsp;

Precondition	User is on the Resource Bank section and similar proposals are displayed.
Estimated exec. duration (HH:MM)	
Priority	High

Estimated exec. duration (HH:MM)	
Priority	High

#496 : Verify User Can Access the Budget Section	
Author	Dinesh Saiwal
Summary	Ensure the user can navigate to the budget section within the proposal overview page.
Precondition	User is logged into the Powergear application and has access to the proposal overview page from the Proposal Bank.
Estimated exec. duration (HH:MM)	
Priority	High

#497 : Verify UI Elements for Budget Input Fields	
Author	Dinesh Saiwal
Summary	Verify that the budget popup contains all the necessary input fields.
Precondition	User clicks on the \$ icon in the budget section.
Estimated exec. duration (HH:MM)	
Priority	High

#498 : Verify Bill of Quantities Field Accepts Only Numeric Input	
Author	Dinesh Saiwal
Summary	Ensure the Bill of Quantities field allows only numeric values.
Precondition	User has accessed the budget input fields by clicking on the \$ icon.
Estimated exec. duration (HH:MM)	
Priority	High

#499 : Verify Taxes Field Accepts Only Numeric Input	
Author	Dinesh Saiwal
Summary	Ensure the Taxes field allows only numeric values.
Precondition	User has accessed the budget input fields by clicking on the \$ icon.
Estimated exec. duration (HH:MM)	
Priority	High

#500 : Verify Profit Margin Field Accepts Only Numeric Input	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure the Profit Margin field allows only numeric values.&nbsp;
Precondition	User has accessed the budget input fields by clicking on the \$ icon.
Estimated exec. duration (HH:MM)	
Priority	High

#501 : Verify Total Quote Calculation	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure the Total Quote field correctly calculates the sum of Bill of Quantities, Taxes, and Profit Margin.&nbsp;
Precondition	User has entered numeric values in all three input fields.
Estimated exec. duration (HH:MM)	
Priority	High

#502 : Verify Submit Button is Disabled When Any Mandatory Field is Empty	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure the Submit button remains disabled if any input field is left empty.&nbsp;

Precondition	User is on the budget popup with at least one field left blank.
Estimated exec. duration (HH:MM)	
Priority	High

#503 : Verify Budget Submission with Valid Data	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure the budget is successfully added when valid numeric values are entered.&nbsp;
Precondition	User enters valid numeric values in all input fields and clicks Submit.
Estimated exec. duration (HH:MM)	
Priority	High

#504 : Verify Budget Appears in Budget Section After Submission	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure the submitted budget data is displayed in the budget section.&nbsp;
Precondition	User has successfully submitted the budget details.

Estimated exec. duration (HH:MM)	
Priority	High

#505 : Verify Budget Section Expands to Show Submitted Data	
Author	Dinesh Saiwal
Summary	Ensure that after submitting the budget, the section can be expanded to view the details.
Precondition	User has successfully submitted the budget and tries to expand the budget section.
Estimated exec. duration (HH:MM)	
Priority	High

#506 : Verify Budget Submission with Negative Values	
Author	Dinesh Saiwal
Summary	Ensure negative values are not allowed in Bill of Quantities, Taxes, or Profit Margin fields.
Precondition	User enters negative numbers in any field and tries to submit.
Estimated exec. duration (HH:MM)	
Priority	High

#507 : Verify Large Numeric Values in Budget Fields	
Author	Dinesh Saiwal
Summary	Ensure the system handles large numeric values without issues.
Precondition	User enters large numeric values in Bill of Quantities, Taxes, and Profit Margin.
Estimated exec. duration (HH:MM)	
Priority	Medium

#508 : Verify Decimal Values in Budget Fields	
Author	Dinesh Saiwal
Summary	Ensure the system allows decimal values where applicable.
Precondition	User enters decimal values in the input fields.
Estimated exec. duration (HH:MM)	
Priority	High

#509 : Verify User Can Add an Extra Field to Budget Estimation	

Author	Dinesh Saiwal
Summary	User is logged into the Powergear application and on the Proposal Overview page.
Precondition	Ensure that clicking the (+) icon adds an untitled field to the budget estimation.
Estimated exec. duration (HH:MM)	
Priority	High

#510 : Verify Added Extra Field Cannot Be Empty	
Author	Dinesh Saiwal
Summary	Ensure that the untitled extra field cannot be left empty before submission.
Precondition	An extra field is added to the budget estimation.
Estimated exec. duration (HH:MM)	
Priority	High

#511 : Verify User Can Remove an Extra Field	
Author	Dinesh Saiwal
Summary	Ensure that clicking on the three dots and selecting "Delete" removes the extra field.

Precondition	At least one extra field is added to the budget estimation.
Estimated exec. duration (HH:MM)	
Priority	High

#512 : Verify User Can Add More Details to an Extra Field	
Author	Dinesh Saiwal
Summary	Ensure that clicking on "Add" in the extra field adds four new mandatory fields: Title, Cost/Hour, No. of Hours, and Count.
Precondition	At least one extra field is added to the budget estimation
Estimated exec. duration (HH:MM)	
Priority	High

#513 : Verify Mandatory Validation for Additional Fields	
Author	Dinesh Saiwal
Summary	Ensure that Title, Cost/Hour, No. of Hours, and Count fields cannot be empty before submission.
Precondition	User has added additional details to an extra field.

Estimated exec. duration (HH:MM)	
Priority	High

#514 : Verify Numeric Validation for Cost/Hour, No. of Hours, and Count Fields	
Author	Dinesh Saiwal
Summary	Ensure that Cost/Hour, No. of Hours, and Count accept only numeric values.
Precondition	User has added additional fields to an extra section.
Estimated exec. duration (HH:MM)	
Priority	High

#515 : Verify Budget Submission with Extra Field and Additional Details	
Author	Dinesh Saiwal
Summary	Ensure that submitting the budget reflects the added extra section in the Budget section table.
Precondition	User has filled all required fields in an extra section.
Estimated exec. duration (HH:MM)	
Priority	High

## 1.6 Folder : Resource Library

#204 : Verify Visibility of Resource Library Section	
Author	Dinesh Saiwal
Summary	Ensure the Resource Library section is visible after logging in.
Precondition	User is logged in to the Powergear application
Estimated exec. duration (HH:MM)	
Priority	High

#205 : Verify Display of Existing Documents in Resource Library	
Author	Dinesh Saiwal
Summary	Ensure all existing documents are displayed in a table format with File ID, File Name, Doc Detail, Uploaded By, and Tags columns.
Precondition	User is logged in to the Powergear application
Estimated exec. duration (HH:MM)	
Priority	High

#206 : Verify Pagination in Resource Library Table	
Author	Dinesh Saiwal
Summary	Ensure the user can navigate through pages if the number of documents exceeds the default rows displayed in the table.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section with multiple documents present.
Estimated exec. duration (HH:MM)	
Priority	Medium

#207 : Verify Visibility of Search Box in Resource Library	
Author	Dinesh Saiwal
Summary	Ensure the search box is visible in the Resource Library section for searching documents.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	Low

#208 : Ensure the user can search for documents using the File Name and matching results are displayed in the table.	

Author	Dinesh Saiwal
Summary	Ensure the user can search for documents using the File Name and matching results are displayed in the table.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#209 : Verify Search by File ID	
Author	Dinesh Saiwal
Summary	Ensure the user can search for documents using the File ID and matching results are displayed in the table.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#210 : Verify Search by Tags	
Author	Dinesh Saiwal
Summary	Ensure the user can search for documents using tags and matching results are displayed in the table.

Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#211 : Verify Partial Match Search for File Name	
Author	Dinesh Saiwal
Summary	Ensure the search functionality supports partial matches for File Names and displays relevant results.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#212 : Verify Partial Match Search for File ID	
Author	Dinesh Saiwal
Summary	Ensure the search functionality supports partial matches for File IDs and displays relevant results.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.

Estimated exec. duration (HH:MM)	
Priority	High

#213 : Verify Partial Match Search for Tags	
Author	Dinesh Saiwal
Summary	Ensure the search functionality supports partial matches for tags and displays relevant results.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#214 : Verify No Results Message for Invalid Search	
Author	Dinesh Saiwal
Summary	Ensure an appropriate "No results found" message is displayed when the search criteria do not match any documents.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#215 : Verify Search is Case-insensitive	
Author	Dinesh Saiwal
Summary	Ensure the search functionality is case-insensitive and retrieves results regardless of letter case in the search query.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#216 : Verify Search Results Reset When Search Query is Cleared	
Author	Dinesh Saiwal
Summary	Ensure the document list resets to display all records when the search query is cleared.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#217 : Verify Sorting by File ID Column in Ascending Order	

Author	Dinesh Saiwal
Summary	Ensure documents are sorted in ascending order based on File ID when the sort icon is clicked.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#218 : Verify Sorting by File ID Column in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure documents are sorted in descending order based on File ID when the sort icon is clicked again.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#219 : Verify Sorting by File Name Column in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure documents are sorted in ascending alphabetical order based on File Name when the sort icon is clicked.

Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#220 : Verify Sorting by File Name Column in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure documents are sorted in descending alphabetical order based on File Name when the sort icon is clicked again.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#221 : Verify Sorting by Uploaded By Column in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure documents are sorted in ascending alphabetical order based on the Uploaded By column when the sort icon is clicked.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.

Estimated exec. duration (HH:MM)	
Priority	High

#222 : Verify Sorting by Uploaded By Column in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure documents are sorted in descending alphabetical order based on the Uploaded By column when the sort icon is clicked again.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#223 : Verify Default Sorting Order When Page is Loaded	
Author	Dinesh Saiwal
Summary	Ensure the default sorting order of documents is displayed correctly upon loading the Resource Library section.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#224 : Verify Visibility of Filter Options for "Uploaded By" and "Tags"	
Author	Dinesh Saiwal
Summary	Ensure the filter options for "Uploaded By" and "Tags" are visible in the Resource Library section.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#225 : Verify Filtering by "Uploaded By" with Single Selection	
Author	Dinesh Saiwal
Summary	Ensure filtering by "Uploaded By" displays only documents uploaded by the selected user.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#226 : Verify Filtering by "Tags" with Single Selection	

Author	Dinesh Saiwal
Summary	Ensure filtering by a specific tag displays only documents associated with the selected tag.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#227 : Verify Filtering by "Uploaded By" with Multiple Selections	
Author	Dinesh Saiwal
Summary	Ensure filtering by multiple "Uploaded By" selections displays documents uploaded by any of the selected users.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#228 : Verify Filtering by "Tags" with Multiple Selections	
Author	Dinesh Saiwal
Summary	Ensure filtering by multiple tags displays documents associated with any of the selected tags.

Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#229 : Verify Reset Button Clears All Filters	
Author	Dinesh Saiwal
Summary	Ensure clicking the reset button clears all applied filters and displays the full list of documents.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#230 : Verify "No Results Found" When Filter Criteria Do Not Match Any Document	
Author	Dinesh Saiwal
Summary	Ensure the "No Results Found" message is displayed when no documents match the applied filter criteria.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.

Estimated exec. duration (HH:MM)	
Priority	High

#231 : Verify Combining Filters for "Uploaded By" and "Tags"	
Author	Dinesh Saiwal
Summary	Ensure combining filters for "Uploaded By" and "Tags" displays only the documents that match both criteria.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#232 : Verify Visibility of Upload Button in Resource Library Section	
Author	Dinesh Saiwal
Summary	Ensure the "Upload" button is visible in the Resource Library section for the Bid Manager.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#233 : Verify Upload Popup Opens Upon Clicking Upload Button	
Author	Dinesh Saiwal
Summary	Ensure the upload popup is displayed when the user clicks on the "Upload" button.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#235 : Verify Error Message for Unsupported File Formats	
Author	Dinesh Saiwal
Summary	Ensure an appropriate error message is displayed when the user attempts to upload unsupported file formats.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#241 : Verify Cancel Button in Upload Popup	

Author	Dinesh Saiwal
Summary	Ensure clicking the cancel button in the upload popup closes the popup without uploading the file.
Precondition	User is logged in to the Powergear application as a Bid Manager and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#243 : Verify Visibility of Action Icons on Hover	
Author	Dinesh Saiwal
Summary	Ensure the "View," "Edit," "Download," and "Delete" icons appear when hovering over a document in the Resource Library table.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#244 : Verify Document Opens in Preview Mode on Clicking "View"	
Author	Dinesh Saiwal
Summary	Ensure clicking the "View" icon opens a preview window displaying the document contents.

Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#245 : Verify "Edit" Popup Opens on Clicking "Edit" Icon	
Author	Dinesh Saiwal
Summary	Ensure clicking the "Edit" icon opens a popup allowing the user to edit the File Name, Doc Detail, and Tags fields.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#246 : Verify Successful Editing of File Name, Doc Detail, and Tags	
Author	Dinesh Saiwal
Summary	Ensure updates to the File Name, Doc Detail, and Tags fields are saved successfully upon clicking "Save" in the Edit popup.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.

Estimated exec. duration (HH:MM)	
Priority	High

#247 : Verify Cancel Button in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure clicking the "Cancel" button in the Edit popup closes the popup without saving changes.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#248 : Verify File Download Functionality on Clicking "Download" Icon	
Author	Dinesh Saiwal
Summary	Ensure clicking the "Download" icon successfully downloads the selected file in its original format.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#249 : Verify Delete Confirmation Popup on Clicking "Delete" Icon	
Author	Dinesh Saiwal
Summary	Ensure clicking the "Delete" icon displays a confirmation popup asking the user to confirm or cancel the delete action.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#250 : Verify Successful Deletion of Document	
Author	Dinesh Saiwal
Summary	Ensure the document is removed from the Resource Library table and a success message is displayed after confirming the delete action.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#251 : Verify Canceling Delete Action Retains the Document	

Author	Dinesh Saiwal
Summary	Ensure the document remains in the Resource Library table if the delete action is canceled in the confirmation popup.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#252 : Verify Validation for Empty Fields in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure an appropriate error message is displayed if the user attempts to save changes in the Edit popup with empty fields.
Precondition	User is logged in to the Powergear application and navigates to the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#253 : Verify "Doc Detail" Field is Mandatory in Upload Popup	
Author	Dinesh Saiwal
Summary	Ensure the "Doc Detail" field is required and provides a validation error when left empty.

Precondition	User has opened the upload popup in the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#254 : Verify Character Limit for "Doc Detail" Field	
Author	Dinesh Saiwal
Summary	Ensure the "Doc Detail" field enforces the specified character limit and displays an error if exceeded.
Precondition	User has opened the upload popup in the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#255 : Verify "Tags" Field Allows Selection of Existing Tags	
Author	Dinesh Saiwal
Summary	Ensure the "Tags" field allows the user to select from a list of existing tags.
Precondition	User has opened the upload popup in the Resource Library section.

Estimated exec. duration (HH:MM)	
Priority	High

#256 : Verify "Tags" Field Allows Entry of New Tags	
Author	Dinesh Saiwal
Summary	Ensure the "Tags" field allows the user to input and add new tags.
Precondition	User has opened the upload popup in the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#257 : Verify Drag and Drop Functionality for File Upload	
Author	Dinesh Saiwal
Summary	Ensure the user can drag and drop supported files (.pdf, .docx, .xls) into the upload section.
Precondition	User has opened the upload popup in the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#258 : Verify File Selection from Local Storage	
Author	Dinesh Saiwal
Summary	Ensure the user can browse and select supported files (.pdf, .docx, .xls) from local storage.
Precondition	User has opened the upload popup in the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#259 : Verify Error Message for Unsupported File Format	
Author	Dinesh Saiwal
Summary	Ensure the system displays an error message when attempting to upload unsupported file formats (e.g., .txt, .jpg).
Precondition	User has opened the upload popup in the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	High

#260 : Verify File Upload Completes Successfully	

Author	Dinesh Saiwal
Summary	Ensure that supported files are uploaded successfully after all required fields are filled.
Precondition	User has entered valid values in the "Doc Detail" and "Tags" fields and selected a supported file.
Estimated exec. duration (HH:MM)	
Priority	High

#261 : Verify Document Appears in Resource Library Table After Upload	
Author	Dinesh Saiwal
Summary	Ensure the uploaded document is listed in the Resource Library table with the entered details.
Precondition	User has successfully uploaded a document.
Estimated exec. duration (HH:MM)	
Priority	High

#262 : Verify Error for Exceeding Maximum File Size Limit	
Author	Dinesh Saiwal
Summary	Ensure the system prevents the upload of files exceeding the maximum allowed size and displays an error message.

Precondition	User has opened the upload popup in the Resource Library section.
Estimated exec. duration (HH:MM)	
Priority	Low

## 1.7 Folder : AI Agent

#338 : Verify AI Agent Overview is Displayed Correctly	
Author	Dinesh Saiwal
Summary	Ensure that the AI agent overview is displayed correctly in the AI agent section.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#339 : Verify Document Trained Count	
Author	Dinesh Saiwal
Summary	Check that the count of 'Document trained' is displayed correctly in the overview.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.

Estimated exec. duration (HH:MM)	
Priority	High

#340 : Verify Document Untrained Count

Author	Dinesh Saiwal
Summary	Ensure that the count of 'Document untrained' is displayed correctly in the overview.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#341 : Verify Last Trained Days

Author	Dinesh Saiwal
Summary	Ensure that the "Last trained" section accurately displays the number of days since the last training.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	

Priority	High
----------	------

#342 : Verify Current Status Accuracy	
Author	Dinesh Saiwal
Summary	Ensure that the "Current status" section accurately displays the percentage of accuracy of the AI model.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#343 : Verify Sorting by Model Version	
Author	Dinesh Saiwal
Summary	Ensure that the user can sort the AI agent list by model version in ascending and descending order.&nbsp;
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#344 : Verify Sorting by Last Trained On	
--	--

Author	Dinesh Saiwal
Summary	Ensure that the user can sort the AI agent list by the date it was last trained on in ascending and descending order.&nbsp;
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#345 : Verify Sorting by Data Size	
Author	Dinesh Saiwal
Summary	Ensure that the user can sort the AI agent list by data size in ascending and descending order.&nbsp;
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#346 : Verify Sorting by Accuracy	
Author	Dinesh Saiwal
Summary	Ensure that the user can sort the AI agent list by accuracy in ascending and descending order.&nbsp;

Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#347 : Verify Default Sorting Order	
Author	Dinesh Saiwal
Summary	Ensure that the AI agent list has a default sorting order when the user first navigates to the AI agent section.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	Medium

#348 : Verify Model Metrics Display	
Author	Dinesh Saiwal
Summary	Ensure that the model metrics are displayed correctly on the AI agent section.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.

Estimated exec. duration (HH:MM)	
Priority	High

#349 : Validate Accuracy Percentage on X-axis	
Author	Dinesh Saiwal
Summary	Check that the accuracy percentage is correctly displayed on the X-axis of the model metrics chart.&nbsp;
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#350 : Validate Model Versions on Y-axis	
Author	Dinesh Saiwal
Summary	Confirm that the model versions are correctly displayed on the Y-axis of the model metrics chart.
Precondition	The user is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#351 : Validate AI Agent Response Similarity	
Author	Dinesh Saiwal
Summary	Ensure that the user can validate the current AI agent's response by comparing it with responses from two earlier versions and checking the similarity percentage.
Precondition	User is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#352 : Display of AI Agent Responses	
Author	Dinesh Saiwal
Summary	Verify that the responses from the current AI agent and the two earlier versions are displayed correctly.
Precondition	User is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#353 : Accurate Similarity Percentage Calculation	
---	--

Author	Dinesh Saiwal
Summary	Ensure that the similarity percentage between the current AI agent's response and the responses from the two earlier versions is calculated accurately.
Precondition	User is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#354 : Handling Invalid Queries	
Author	Dinesh Saiwal
Summary	Verify that the application provides appropriate feedback or error messages when the user enters invalid or nonsensical queries.
Precondition	User is logged into the Powergear application with valid credentials and has navigated to the AI agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#355 : Verify the display of AI model details.	
Author	Dinesh Saiwal

Summary	Ensure the trained model details, such as Model Version, Last Trained On, Data Size, Accuracy, and Status, are displayed correctly.
Precondition	The user is logged into the Powergear application and navigated to the AI Agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#356 : Verify the initial 'Live' status of a model.	
Author	Dinesh Saiwal
Summary	Ensure that only one model is marked as 'Live' when the user views the trained model details.
Precondition	The trained model details are visible in the AI Agent section.
Estimated exec. duration (HH:MM)	
Priority	High

#357 : Verify 'Go Live' functionality for switching models.	
Author	Dinesh Saiwal
Summary	Ensure that clicking the 'Go Live' button for an AI model changes its status to 'Live' and the previous 'Live' model status updates.
Precondition	At least one AI model version has the 'Go Live' status.

Estimated exec. duration (HH:MM)	
Priority	High

#358 : Verify only one model can be 'Live' at a time.	
Author	Dinesh Saiwal
Summary	Ensure that when a new AI model version is switched to 'Live', other models automatically change to the 'Go Live' status.
Precondition	A model is already marked as 'Live'.
Estimated exec. duration (HH:MM)	
Priority	High

#359 : Verify status update after clicking 'Go Live'.	
Author	Dinesh Saiwal
Summary	Ensure the status of the selected AI model updates to 'Live' immediately after clicking the 'Go Live' button.
Precondition	The user has clicked the 'Go Live' button for a specific model version.Let me know if you want any additional details!
Estimated exec. duration (HH:MM)	
Priority	High

#360 : Verify Visibility of Start Training Button	
Author	Dinesh Saiwal
Summary	Ensure the Start Training button is visible in the AI Agent section.
Precondition	User is logged in to the Powergear application and navigates to the AI Agent section.
Estimated exec. duration (HH:MM)	
Priority	High
#361 : Verify Start Training Button Functionality	
Author	Dinesh Saiwal
Summary	Ensure clicking the Start Training button initiates the model training process with progress details.
Precondition	User is on the AI Agent section and the Start Training button is visible.
Estimated exec. duration (HH:MM)	
Priority	High
#362 : Verify Display of Training Progress	

Author	Dinesh Saiwal
Summary	Ensure the system displays the estimated time and completion percentage while the model is being trained.
Precondition	User has started the model training process.
Estimated exec. duration (HH:MM)	
Priority	High

#363 : Verify Visibility of Validate Button After Training Completion	
Author	Dinesh Saiwal
Summary	Ensure the Validate button is enabled after the model training process is completed.
Precondition	Model training has been completed successfully.
Estimated exec. duration (HH:MM)	
Priority	High

#364 : Verify Navigation to Comparison Screen on Clicking Validate Button	
Author	Dinesh Saiwal
Summary	

	Ensure clicking the Validate button navigates the user to a screen displaying the original and AI-generated proposal previews for comparison.
Precondition	Model training is complete, and the Validate button is enabled.
Estimated exec. duration (HH:MM)	
Priority	High

#365 : Verify Display of Original and AI-Generated Proposal Previews	
Author	Dinesh Saiwal
Summary	Ensure the original proposal preview and AI-generated proposal preview are displayed side-by-side for comparison.
Precondition	User has clicked the Validate button and is on the comparison screen.
Estimated exec. duration (HH:MM)	
Priority	High

#366 : Verify Visibility of Explore Another Proposal Button	
Author	Dinesh Saiwal
Summary	Ensure the Explore Another Proposal button is visible on the comparison screen.
Precondition	User is on the proposal comparison screen after validating the trained model.

Estimated exec. duration (HH:MM)	
Priority	High

#367 : Verify Explore Another Proposal Functionality	
Author	Dinesh Saiwal
Summary	Ensure clicking the Explore Another Proposal button displays a comparison of another proposal.
Precondition	User is on the proposal comparison screen, and the Explore Another Proposal button is visible.
Estimated exec. duration (HH:MM)	
Priority	High

## 1.8 Folder : Proposal Bank

#369 : Verify Visibility of Proposal Bank Section	
Author	Dinesh Saiwal
Summary	Ensure the Proposal Bank section is visible to the user after navigation.
Precondition	User is logged in to the Powergear application and navigates to the Proposal Bank section.

Estimated exec. duration (HH:MM)	
Priority	High

#370 : Verify Display of Drafted Proposals in Proposal Bank	
Author	Dinesh Saiwal
Summary	Ensure all drafted proposals are displayed in the Proposal Bank section with columns: Proposal ID, Proposal Title, Client, Due Date, Bid Status, Tags, Progress, Budget, and Team.
Precondition	User has existing drafted proposals stored in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#371 : Verify Visibility of Search Box in Proposal Bank	
Author	Dinesh Saiwal
Summary	Ensure the search box is visible in the Proposal Bank section.
Precondition	User is logged in and navigates to the Proposal Bank section.
Estimated exec. duration (HH:MM)	

Priority	High
----------	------

#372 : Verify Search by Proposal ID	
Author	Dinesh Saiwal
Summary	Ensure the user can search for a proposal using its Proposal ID, and matching results are displayed.
Precondition	User is on the Proposal Bank section, and proposals with unique IDs exist.
Estimated exec. duration (HH:MM)	
Priority	High

#373 : Verify Search by Proposal Title	
Author	Dinesh Saiwal
Summary	Ensure the user can search for a proposal using its Proposal Title, and matching results are displayed.
Precondition	User is on the Proposal Bank section, and proposals with unique titles exist.
Estimated exec. duration (HH:MM)	
Priority	High

#374 : Verify Partial Match Search by Proposal ID	
---	--

Author	Dinesh Saiwal
Summary	Ensure the system returns matching results when a user searches for a partial Proposal ID.
Precondition	User is on the Proposal Bank section, and Proposal IDs contain alphanumeric strings.
Estimated exec. duration (HH:MM)	
Priority	High

#375 : Verify Partial Match Search by Proposal Title	
Author	Dinesh Saiwal
Summary	Ensure the system returns matching results when a user searches for a partial Proposal Title.
Precondition	User is on the Proposal Bank section, and Proposal Titles contain alphanumeric or text values.
Estimated exec. duration (HH:MM)	
Priority	High

#376 : Verify Search is Case-Insensitive for proposal bank	
Author	Dinesh Saiwal
Summary	Ensure the search functionality works regardless of the case (uppercase or lowercase) of the input in Proposal ID and Title fields.

Precondition	User is on the Proposal Bank section, and proposals exist with mixed-case IDs and Titles.
Estimated exec. duration (HH:MM)	
Priority	High

#377 : Verify No Results Message for Invalid Search Queries	
Author	Dinesh Saiwal
Summary	Ensure the system displays a "No Results Found" message when no proposals match the search criteria.
Precondition	User is on the Proposal Bank section and enters an invalid Proposal ID or Title.
Estimated exec. duration (HH:MM)	
Priority	High

#378 : Verify Resetting the Search Clears Results	
Author	Dinesh Saiwal
Summary	Ensure that clearing the search query resets the Proposal Bank section to display all drafted proposals.
Precondition	User has performed a search in the Proposal Bank section.

Estimated exec. duration (HH:MM)	
Priority	High

#379 : Verify Visibility of Sort Icons for Columns	
Author	Dinesh Saiwal
Summary	Ensure that sort icons are visible next to the Proposal ID, Proposal Title, Client, and Due Date columns in the Proposal Bank section.
Precondition	User is logged in to the Powergear application and navigates to the Proposal Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#380 : Verify Sorting by Proposal ID in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon for Proposal ID arranges the proposals in ascending order by their ID.
Precondition	User is on the Proposal Bank section, and proposals with different Proposal IDs are displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#381 : Verify Sorting by Proposal ID in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon again for Proposal ID arranges the proposals in descending order.
Precondition	User is on the Proposal Bank section, and proposals with different Proposal IDs are displayed.
Estimated exec. duration (HH:MM)	
Priority	High
#382 : Verify Sorting by Proposal Title in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon for Proposal Title arranges the proposals in alphabetical order (A-Z).
Precondition	User is on the Proposal Bank section, and proposals with different titles are displayed.
Estimated exec. duration (HH:MM)	
Priority	High
#383 : Verify Sorting by Proposal Title in Descending Order	

Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon again for Proposal Title arranges the proposals in reverse alphabetical order (Z-A).
Precondition	User is on the Proposal Bank section, and proposals with different titles are displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#384 : Verify Sorting by Client in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon for Client arranges the proposals in alphabetical order (A-Z) based on the client names.
Precondition	User is on the Proposal Bank section, and proposals with different client names are displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#385 : Verify Sorting by Client in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon again for Client arranges the proposals in reverse alphabetical order (Z-A).

Precondition	User is on the Proposal Bank section, and proposals with different client names are displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#386 : Verify Sorting by Due Date in Ascending Order	
Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon for Due Date arranges the proposals from the earliest to the latest date.
Precondition	User is on the Proposal Bank section, and proposals with different due dates are displayed.
Estimated exec. duration (HH:MM)	
Priority	High

#387 : Verify Sorting by Due Date in Descending Order	
Author	Dinesh Saiwal
Summary	Ensure that clicking the sort icon again for Due Date arranges the proposals from the latest to the earliest date.
Precondition	User is on the Proposal Bank section, and proposals with different due dates are displayed.

Estimated exec. duration (HH:MM)	
Priority	High

#388 : Verify Default Sorting on Page Load	
Author	Dinesh Saiwal
Summary	Ensure that the proposals are displayed in a default sorting order (e.g., by Proposal ID in ascending order) when the Proposal Bank page is loaded.
Precondition	User is on the Proposal Bank section with visible proposals.
Estimated exec. duration (HH:MM)	
Priority	High

#389 : Verify Visibility of Filter Button in Proposal Bank	
Author	Dinesh Saiwal
Summary	Ensure that the Filter button is visible in the Proposal Bank section, allowing users to filter proposals.
Precondition	User is logged in to the Powergear application and navigates to the Proposal Bank section.
Estimated exec. duration (HH:MM)	

Priority	High
----------	------

#390 : Verify Filter Popup Opens on Clicking the Filter Button	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Filter button opens the filter popup with filter fields such as Client, Tags, Bid Status, Due Date, Progress, and Budget.
Precondition	User is on the Proposal Bank section and clicks the Filter button.
Estimated exec. duration (HH:MM)	
Priority	High

#391 : Verify Client Dropdown Field in Filter Popup	
Author	Dinesh Saiwal
Summary	Ensure that the Client dropdown field in the filter popup displays a list of available clients for selection.
Precondition	User has opened the filter popup.
Estimated exec. duration (HH:MM)	
Priority	High

--

#392 : Verify Tags Dropdown Field in Filter Popup	
Author	Dinesh Saiwal
Summary	Ensure that the Tags dropdown field in the filter popup displays available tags for selection.
Precondition	User has opened the filter popup.
Estimated exec. duration (HH:MM)	
Priority	High

#393 : Verify Bid Status Dropdown Field in Filter Popup	
Author	Dinesh Saiwal
Summary	Ensure that the Bid Status dropdown field in the filter popup allows the user to select different bid statuses.
Precondition	User has opened the filter popup.
Estimated exec. duration (HH:MM)	
Priority	High

#394 : Verify Due Date Date Picker in Filter Popup	
Author	Dinesh Saiwal

Summary	Ensure that the Due Date field in the filter popup allows the user to select a date range using a date picker.
Precondition	User has opened the filter popup.
Estimated exec. duration (HH:MM)	
Priority	High

#395 : Verify Progress Range Filter (From and To)	
Author	Dinesh Saiwal
Summary	Ensure that the Progress field allows users to filter proposals based on a progress range using From and To fields.
Precondition	User has opened the filter popup.
Estimated exec. duration (HH:MM)	
Priority	High

#396 : Verify Budget Range Filter (From and To)	
Author	Dinesh Saiwal
Summary	Ensure that the Budget field allows users to filter proposals based on a budget range using From and To fields
Precondition	User has opened the filter popup.

Estimated exec. duration (HH:MM)	
Priority	High

#397 : Verify Apply Button Applies Filters	
Author	Dinesh Saiwal
Summary	Ensure that after selecting filter criteria, clicking the Apply button filters the proposals accordingly in the Proposal Bank section.
Precondition	User has selected filter criteria in the filter popup and clicked Apply.
Estimated exec. duration (HH:MM)	
Priority	High

#398 : Verify Reset Button Clears All Filters for proposal	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Reset button clears all applied filters and resets the view to display all proposals.
Precondition	User has selected filter criteria in the filter popup and clicks Reset.
Estimated exec. duration (HH:MM)	
Priority	High

#399 : Verify Filtered Proposals Are Displayed After Applying Filters	
Author	Dinesh Saiwal
Summary	Ensure that after applying filters, the displayed proposals match the filter criteria (Client, Tags, Bid Status, Due Date, Progress, Budget).
Precondition	User has applied filters using the Apply button.
Estimated exec. duration (HH:MM)	
Priority	High

#400 : Verify No Results Found When Filters Do Not Match Any Proposal	
Author	Dinesh Saiwal
Summary	Ensure that if the filter criteria do not match any proposal, the system displays a "No Results Found" message.
Precondition	User has applied filter criteria that do not match any proposals.
Estimated exec. duration (HH:MM)	
Priority	High

#401 : Verify Filter Functionality With Multiple Filters Applied	

Author	Dinesh Saiwal
Summary	Ensure that the system allows multiple filters (e.g., Client, Tags, Due Date) to be applied simultaneously.
Precondition	User has applied multiple filters and clicked Apply.
Estimated exec. duration (HH:MM)	
Priority	High

#402 : Verify Date Range Validation for Due Date Filter	
Author	Dinesh Saiwal
Summary	Ensure that the Due Date filter does not allow invalid date ranges (e.g., start date after end date).&nbsp;
Precondition	User attempts to apply an invalid date range in the Due Date filter.
Estimated exec. duration (HH:MM)	
Priority	High

#403 : Verify Progress Filter Displays Correct Range of Proposals	
Author	Dinesh Saiwal
Summary	Ensure that the Progress filter accurately displays proposals within the specified progress range.

Precondition	User has selected a valid progress range and clicked Apply.
Estimated exec. duration (HH:MM)	
Priority	High

#404 : Verify Budget Filter Displays Correct Range of Proposals	
Author	Dinesh Saiwal
Summary	Ensure that the Budget filter accurately displays proposals within the specified budget range.&nbsp;
Precondition	User has selected a valid budget range and clicked Apply.
Estimated exec. duration (HH:MM)	
Priority	High

#405 : Verify Visibility of Edit Icon for Proposal	
Author	Dinesh Saiwal
Summary	Ensure the edit icon is visible when hovering over a proposal in the Proposal Bank section.
Precondition	User is logged in to the Powergear application and has access to the Proposal Bank section with proposals listed.

Estimated exec. duration (HH:MM)	
Priority	High

#406 : Verify Edit Popup Opens on Clicking the Edit Icon	
Author	Dinesh Saiwal
Summary	Ensure clicking the edit icon opens a popup with editable fields for the proposal.
Precondition	User is on the Proposal Bank section and hovers over a proposal to reveal the edit icon.
Estimated exec. duration (HH:MM)	
Priority	High

#407 : Verify Visibility of Project Title Field in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure the Project Title field is visible and is a mandatory input field with a 100-character limit.
Precondition	User clicks the edit icon for a proposal, opening the edit popup.
Estimated exec. duration (HH:MM)	
Priority	High

#408 : Verify Project Title Field Character Limit	
Author	Dinesh Saiwal
Summary	Ensure the Project Title field has a 100-character limit and displays an error if exceeded.
Precondition	User is in the edit popup for a proposal and enters more than 100 characters in the Project Title field.
Estimated exec. duration (HH:MM)	
Priority	High
#409 : Verify Visibility of Client Field in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure the Client field is visible and is a mandatory input field with a 100-character limit.
Precondition	User clicks the edit icon for a proposal, opening the edit popup.
Estimated exec. duration (HH:MM)	
Priority	High
#410 : Verify Client Field Character Limit	

Author	Dinesh Saiwal
Summary	Ensure the Client field has a 100-character limit and displays an error if exceeded.
Precondition	User is in the edit popup for a proposal and enters more than 100 characters in the Client field.
Estimated exec. duration (HH:MM)	
Priority	High

#411 : Verify Due Date Date Picker in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure the Due Date field is visible and allows the user to select a date using a date picker.
Precondition	User clicks the edit icon for a proposal, opening the edit popup.
Estimated exec. duration (HH:MM)	
Priority	High

#412 : Verify Bid Status Dropdown in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure the Bid Status dropdown field is visible and is a mandatory field for selecting a bid status.

Precondition	User clicks the edit icon for a proposal, opening the edit popup.
Estimated exec. duration (HH:MM)	
Priority	High

#413 : Verify Tags Field in Edit Popup	
Author	Dinesh Saiwal
Summary	Ensure the Tags field is visible as a dropdown that allows input and selection of tags.&nbsp;
Precondition	User clicks the edit icon for a proposal, opening the edit popup.
Estimated exec. duration (HH:MM)	
Priority	High

#414 : Verify Save Changes Button Functionality	
Author	Dinesh Saiwal
Summary	Ensure that after editing the fields, clicking the Save Changes button saves the changes and updates the proposal.&nbsp;
Precondition	&nbsp;User has made edits in the popup and clicks the Save Changes button.

Estimated exec. duration (HH:MM)	
Priority	High

#415 : Verify Reset Button Functionality	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Reset button clears all changes made in the edit popup and restores the original proposal values.
Precondition	User has made changes in the popup and clicks the Reset button.
Estimated exec. duration (HH:MM)	
Priority	High

#416 : Verify Successful Update of Proposal	
Author	Dinesh Saiwal
Summary	Ensure that after clicking Save Changes, the proposal is updated and displayed with the new values.
Precondition	User has edited the proposal and clicked Save Changes.
Estimated exec. duration (HH:MM)	
Priority	High

#417 : Verify Validation for Empty Mandatory Fields	
Author	Dinesh Saiwal
Summary	Ensure that the user cannot save the proposal if mandatory fields (Project Title, Client, Bid Status) are left empty.
Precondition	User leaves the mandatory fields empty in the edit popup and attempts to save.
Estimated exec. duration (HH:MM)	
Priority	High

#418 : Verify Error Message for Invalid Due Date	
Author	Dinesh Saiwal
Summary	Ensure that if an invalid due date is selected (e.g., a past date), the system shows an error message.
Precondition	User selects an invalid due date (e.g., a past date) in the edit popup and attempts to save.
Estimated exec. duration (HH:MM)	
Priority	High

#419 : Verify Tags Dropdown Field Displays Existing Tags	

Author	Dinesh Saiwal
Summary	Ensure the Tags dropdown field displays all available tags for selection.
Precondition	User clicks the edit icon for a proposal, opening the edit popup.
Estimated exec. duration (HH:MM)	
Priority	High

#420 : Verify Default Values for Fields When Editing	
Author	Dinesh Saiwal
Summary	Ensure the fields in the edit popup display the current values of the proposal by default when opened for editing.
Precondition	User clicks the edit icon for a proposal and opens the edit popup.
Estimated exec. duration (HH:MM)	
Priority	High

#421 : Verify Visibility of Download Icon for Proposal	
Author	Dinesh Saiwal
Summary	Ensure the Download icon is visible when hovering over a proposal in the Proposal Bank section.&nbsp;

Precondition	User is logged in to the Powergear application and proposals are displayed in the Proposal Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#422 : Verify Download Functionality for Proposal	
Author	Dinesh Saiwal
Summary	Ensure that clicking the Download icon downloads the selected proposal file.&nbsp;
Precondition	User hovers over a proposal and clicks on the Download icon
Estimated exec. duration (HH:MM)	
Priority	High

#423 : Verify File Name and Format of Downloaded Proposal	
Author	Dinesh Saiwal
Summary	Ensure the downloaded proposal has the correct file name and format.&nbsp;
Precondition	User downloads a proposal from the Proposal Bank section.

Estimated exec. duration (HH:MM)	
Priority	High

#424 : Verify Visibility of Delete Icon for Proposal	
Author	Dinesh Saiwal
Summary	Ensure the Delete icon is visible when hovering over a proposal in the Proposal Bank section.&nbsp;
Precondition	User is logged in to the Powergear application and proposals are displayed in the Proposal Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#425 : Verify Alert Popup Appears on Clicking Delete Icon	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure clicking the Delete icon opens an alert popup asking for confirmation before deleting the proposal.&nbsp;
Precondition	User hovers over a proposal and clicks on the Delete icon.
Estimated exec. duration (HH:MM)	
Priority	High

#426 : Verify Cancel Button in Delete Confirmation Popup	
Author	Dinesh Saiwal
Summary	Ensure clicking the Cancel button in the delete confirmation popup retains the proposal.
Precondition	User clicks on the Delete icon and the alert popup appears
Estimated exec. duration (HH:MM)	
Priority	High

#427 : Verify Successful Deletion of Proposal	
Author	Dinesh Saiwal
Summary	Ensure clicking the Confirm or Yes button in the delete confirmation popup deletes the selected proposal.
Precondition	User clicks on the Delete icon and confirms the deletion in the alert popup.
Estimated exec. duration (HH:MM)	
Priority	High

#428 : Verify Role-Based Access for Download and Delete Icons	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure only authorized users have access to the Download and Delete icons in the Proposal Bank.&nbsp;
Precondition	User has logged in with a role that may or may not have permissions for these actions.
Estimated exec. duration (HH:MM)	
Priority	High

#429 : Verify Visibility of Eye Icon on Hover Over Proposal	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that the Eye icon is visible when the user hovers over a proposal in the Proposal Bank section.&nbsp;
Precondition	User is logged in and proposals are displayed in the Proposal Bank section.
Estimated exec. duration (HH:MM)	
Priority	High

#430 : Verify Functionality of Eye Icon to View Proposal	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that clicking the Eye icon navigates the user to the Proposal Overview page for the selected proposal.&nbsp;

Estimated exec. duration (HH:MM)	
Priority	High

### 1.9 Folder : Activity Logs

#433 : Verify Visibility of Activity Logs Section	
Author	Dinesh Saiwal
Summary	Ensure the Activity Logs section is visible and accessible after logging in.
Precondition	User is logged in to the Powergear application with valid credentials.
Estimated exec. duration (HH:MM)	
Priority	High

#434 : Verify Visibility of Columns in Activity Logs	
Author	Dinesh Saiwal
Summary	Ensure the Activity Logs section displays the following columns: User, Role, Action, Date, Time.
Precondition	User has navigated to the Activity Logs section.

Estimated exec. duration (HH:MM)	
Priority	High

#435 : Verify Sorting Functionality for User Column	
Author	Dinesh Saiwal
Summary	Ensure the User column can be sorted in ascending and descending order.
Precondition	User is on the Activity Logs page, and the data is displayed in the table.
Estimated exec. duration (HH:MM)	
Priority	High

#436 : Verify Sorting Functionality for Date Column	
Author	Dinesh Saiwal
Summary	Ensure the Date column can be sorted in ascending and descending order.
Precondition	User is on the Activity Logs page, and the data is displayed in the table.
Estimated exec. duration (HH:MM)	
Priority	High

#437 : Verify Sorting Functionality for Time Column	
Author	Dinesh Saiwal
Summary	Ensure the Time column can be sorted in ascending and descending order.
Precondition	User is on the Activity Logs page, and the data is displayed in the table.
Estimated exec. duration (HH:MM)	
Priority	High

#438 : Verify Default Sorting on Page Load for Activity Logs	
Author	Dinesh Saiwal
Summary	Ensure the Activity Logs section loads with a default sorting order for the sortable columns
Precondition	User is on the Activity Logs page, and the data is displayed in the table.
Estimated exec. duration (HH:MM)	
Priority	High

#439 : Verify Activity Log for "User Logged In"	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure the system logs the action when a user logs in, and it appears in the Activity Logs section.&nbsp;
Precondition	User has valid credentials and is logging into the Powergear application.
Estimated exec. duration (HH:MM)	
Priority	High

#440 : Verify Activity Log for "User Logged Out"	
Author	Dinesh Saiwal
Summary	Ensure the system logs the action when a user logs out, and it appears in the Activity Logs section.&nbsp;
Precondition	User is logged into the Powergear application and logs out.
Estimated exec. duration (HH:MM)	
Priority	High

#441 : Verify Activity Log for "Added Section/SubSection"	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure the system logs when a user adds a section or subsection and displays it in the Activity Logs.&nbsp;

Precondition	User adds a section or subsection in the application.
Estimated exec. duration (HH:MM)	
Priority	High

#442 : Verify Activity Log for "Updated Section/SubSection"	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure the system logs when a user updates a section or subsection and displays it in the Activity Logs.&nbsp;
Precondition	User updates an existing section or subsection.
Estimated exec. duration (HH:MM)	
Priority	High

#443 : Verify Activity Log for "Assigned Member to a Section"	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure the system logs when a user assigns a member to a section and displays it in the Activity Logs.&nbsp;
Precondition	User assigns a member to a section in the proposal.

Estimated exec. duration (HH:MM)	
Priority	High

#444 : Verify Activity Log for "Changed Section Status"	
Author	Dinesh Saiwal
Summary	Ensure the system logs when a user changes the status of a section and displays it in the Activity Logs.
Precondition	User changes the status of a section or subsection.
Estimated exec. duration (HH:MM)	
Priority	High

#445 : Verify Activity Log for "Deleted a Section/SubSection"	
Author	Dinesh Saiwal
Summary	Ensure the system logs when a user deletes a section or subsection and displays it in the Activity Logs.
Precondition	User deletes a section or subsection in the proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#446 : Verify Activity Log for "Added Participants to Proposal"	
Author	Dinesh Saiwal
Summary	Ensure the system logs when a user adds participants to a proposal and displays it in the Activity Logs.&nbsp;
Precondition	User adds participants to a proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#447 : Verify Activity Log for "Removed Participant from Proposal"	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure the system logs when a user removes a participant from a proposal and displays it in the Activity Logs.&nbsp;
Precondition	User removes a participant from a proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#448 : Verify Activity Log for "Drafted New Proposal"	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure the system logs when a user drafts a new proposal and displays it in the Activity Logs.&nbsp;
Precondition	User drafts a new proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#449 : Verify Activity Log for "Exported the Proposal"	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure the system logs when a user exports a proposal and displays it in the Activity Logs.&nbsp;
Precondition	User exports a proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#450 : Verify Activity Log for "Downloaded Proposal Bank File"	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure the system logs when a user downloads a proposal bank file and displays it in the Activity Logs.&nbsp;

Precondition	User downloads a proposal bank file.
Estimated exec. duration (HH:MM)	
Priority	High

#451 : Verify Activity Log for "Downloaded Historical Proposal File"	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure the system logs when a user downloads a historical proposal file and displays it in the Activity Logs.&nbsp;
Precondition	User downloads a historical proposal file.
Estimated exec. duration (HH:MM)	
Priority	High

#452 : Verify Activity Log for "Downloaded Historical Proposal ZIP File"	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure the system logs when a user downloads a historical proposal ZIP file and displays it in the Activity Logs.&nbsp;&nbsp;
Precondition	User downloads a historical proposal ZIP file.

Estimated exec. duration (HH:MM)	
Priority	High

#453 : Verify Activity Log for "Started Training AI Agent"	
Author	Dinesh Saiwal
Summary	Ensure the system logs when a user starts training the AI agent and displays it in the Activity Logs.
Precondition	User starts training the AI agent in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#454 : Verify Activity Log for "Switched AI Agent"	
Author	Dinesh Saiwal
Summary	Ensure the system logs when a user switches the AI agent and displays it in the Activity Logs.
Precondition	User switches the AI agent in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#455 : Verify Visibility of Activity Logs for All Actions	
Author	Dinesh Saiwal
Summary	Ensure that all logged activities are visible in the Activity Logs section after the actions are performed.
Precondition	User has performed one or more of the listed actions in the application.
Estimated exec. duration (HH:MM)	
Priority	High

#456 : Verify Visibility of Filter Button	
Author	Dinesh Saiwal
Summary	Ensure the Filter button is visible in the Activity Logs section.
Precondition	User is logged into the Powergear application and navigated to the Activity Logs section.
Estimated exec. duration (HH:MM)	
Priority	High

#457 : Verify Filter Popup Opens on Clicking the Filter Button for activity logs	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure clicking the Filter button opens the filter popup.&nbsp;
Precondition	User is logged in and has accessed the Activity Logs section.
Estimated exec. duration (HH:MM)	
Priority	High

#458 : Verify Filtering by User	
Author	Dinesh Saiwal
Summary	Ensure filtering by User displays only logs performed by the selected user.
Precondition	Activity logs contain entries from multiple users.
Estimated exec. duration (HH:MM)	
Priority	High

#459 : Verify Filtering by Role	
Author	Dinesh Saiwal
Summary	Ensure filtering by Role displays only logs associated with the selected role.

Precondition	Activity logs contain entries for different roles (Bid Manager, Team Member).
Estimated exec. duration (HH:MM)	
Priority	High

#460 : Verify Filtering by Multiple Criteria (Action, User, Role)	
Author	Dinesh Saiwal
Summary	Ensure selecting Action, User, and Role together filters logs accurately.&nbsp;
Precondition	Logs exist for multiple actions, users, and roles.
Estimated exec. duration (HH:MM)	
Priority	High

#461 : Verify Reset Filter Functionality	
Author	Dinesh Saiwal
Summary	Ensure clicking the Reset button clears all filters and displays all logs
Precondition	Filters are applied, and the logs are filtered.

Estimated exec. duration (HH:MM)	
Priority	High

#462 : Verify No Results Message for Non-Matching Filters	
Author	Dinesh Saiwal
Summary	Ensure selecting a filter combination with no matching logs displays a "No logs found" message.
Precondition	Activity logs do not contain an entry matching the selected filter criteria.
Estimated exec. duration (HH:MM)	
Priority	High

#463 : Verify Filtering by "User Logged In" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "User Logged In" displays only login-related entries.
Precondition	Multiple users have logged in at different times.
Estimated exec. duration (HH:MM)	
Priority	High

#464 : Verify Filtering by "Added Section/SubSection" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Added Section/SubSection" displays only logs related to adding sections.
Precondition	Users have added sections/subsections.
Estimated exec. duration (HH:MM)	
Priority	High

#465 : Verify Filtering by "Updated Section/SubSection" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Updated Section/SubSection" displays only update-related logs.
Precondition	Sections/subsections have been updated by different users.
Estimated exec. duration (HH:MM)	
Priority	High

#466 : Verify Filtering by "Assigned Member to a Section" Action	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure filtering logs by "Assigned Member to a Section" displays logs related to assigning members.
Precondition	Users have been assigned to various sections.
Estimated exec. duration (HH:MM)	
Priority	High

#467 : Verify Filtering by "Changed Section Status" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Changed Section Status" displays logs for section status changes.&nbsp;
Precondition	Some sections have had their status updated.
Estimated exec. duration (HH:MM)	
Priority	High

#468 : Verify Filtering by "Deleted a Section/SubSection" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Deleted a Section/SubSection" displays only logs related to deletions.&nbsp;

Precondition	Users have deleted sections/subsections.
Estimated exec. duration (HH:MM)	
Priority	High

#469 : Verify Filtering by "Added Participants to Proposal" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Added Participants to Proposal" displays only participant addition logs.&nbsp;
Precondition	Participants have been added to proposals.
Estimated exec. duration (HH:MM)	
Priority	High

#470 : Verify Filtering by "Removed Participant from Proposal" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Removed Participant from Proposal" displays only logs related to participant removals.
Precondition	Users have removed participants from proposals.

Estimated exec. duration (HH:MM)	
Priority	High

#471 : Verify Filtering by "Drafted New Proposal" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Drafted New Proposal" displays logs related to new proposal creation.
Precondition	Users have created new proposals.
Estimated exec. duration (HH:MM)	
Priority	High

#472 : Verify Filtering by "Exported the Proposal" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Exported the Proposal" displays only logs related to proposal exports.
Precondition	Proposals have been exported by users.
Estimated exec. duration (HH:MM)	
Priority	High

#473 : Verify Filtering by "Downloaded Proposal Bank File" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Downloaded Proposal Bank File" displays only logs for proposal bank downloads.&nbsp;
Precondition	Users have downloaded files from the proposal bank.
Estimated exec. duration (HH:MM)	
Priority	High

#474 : Verify Filtering by "Downloaded Historical Proposal File" Action	
Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Downloaded Historical Proposal File" displays logs for historical proposal file downloads.&nbsp;
Precondition	Users have downloaded historical proposal files.
Estimated exec. duration (HH:MM)	
Priority	High

#475 : Verify Filtering by "Downloaded Historical Proposal ZIP File" Action	

Author	Dinesh Saiwal
Summary	Ensure filtering logs by "Downloaded Historical Proposal ZIP File" displays logs for ZIP file downloads.&nbsp;
Precondition	Users have downloaded historical proposal ZIP files.
Estimated exec. duration (HH:MM)	
Priority	High

#476 : Verify Filtering by "Started Training AI Agent" Action	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure filtering logs by "Started Training AI Agent" displays logs for AI agent training activities.&nbsp;
Precondition	Users have initiated AI agent training.
Estimated exec. duration (HH:MM)	
Priority	High

#477 : Verify Filtering by "Switched AI Agent" Action	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure filtering logs by "Switched AI Agent" displays logs related to switching AI agents.&nbsp;

Precondition	Users have switched AI agents.
Estimated exec. duration (HH:MM)	
Priority	High

#478 : Verify Applying Multiple Action Filters Together	
Author	Dinesh Saiwal
Summary	Ensure filtering by multiple Action options displays logs that match any selected action.
Precondition	Logs exist for different actions performed by multiple users.
Estimated exec. duration (HH:MM)	
Priority	High

#479 : Verify Filtering by Action with No Matching Logs	
Author	Dinesh Saiwal
Summary	Ensure that selecting an action with no logged entries displays a "No logs found" message.
Precondition	Logs do not exist for the selected action.

Estimated exec. duration (HH:MM)	
Priority	High

#480 : Verify Export Functionality for Activity Logs	
Author	Dinesh Saiwal
Summary	This test case verifies that when the user clicks on the "Export" button, all available log data is exported to an Excel file.
Precondition	User is logged into the Powergear application with valid credentials.User has navigated to the Activity Logs section.There are available logs to export.
Estimated exec. duration (HH:MM)	
Priority	High

#481 : Verify Export Functionality for Filtered Activity Logs	
Author	Dinesh Saiwal
Summary	This test case verifies that when filters are applied, only the filtered activity logs are exported to the Excel file.
Precondition	User is logged into the Powergear application with valid credentials.User has navigated to the Activity Logs section.Filters have been applied to the activity logs.

Estimated exec. duration (HH:MM)	
Priority	High

#482 : Verify Search Functionality for Activity Logs by Action	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can search activity logs by specific actions, and only the logs matching the search criteria are displayed.
Precondition	User is logged into the Powergear application with valid credentials.User has navigated to the Activity Logs section.Activity logs are available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#483 : Verify Search Functionality for Partial Action Text	
Author	Dinesh Saiwal
Summary	This test case verifies that the search functionality can handle partial action text and return matching logs containing the partial text.
Precondition	User is logged into the Powergear application with valid credentials.User has navigated to the Activity Logs section.Activity logs are available in the system.

Estimated exec. duration (HH:MM)	
Priority	High

#484 : Verify Search Functionality When No Logs Match the Search Term	
Author	Dinesh Saiwal
Summary	This test case verifies that if no logs match the entered search term, the system will display a message indicating that no results were found.
Precondition	User is logged into the Powergear application with valid credentials.User has navigated to the Activity Logs section.Activity logs are available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#485 : Verify Search Functionality Reset	
Author	Dinesh Saiwal
Summary	This test case verifies that the user can reset the search filter and see all the activity logs after the search is cleared.
Precondition	User is logged into the Powergear application with valid credentials.User has navigated to the Activity Logs section.Activity logs are available in the system.

Estimated exec. duration (HH:MM)	
Priority	Low

1.10 Folder : Dashboard

#517 : Verify Dashboard Loads Correctly	
Author	Dinesh Saiwal
Summary	Ensure the dashboard loads properly and displays all expected sections.
Precondition	User is logged in and has access to the dashboard.
Estimated exec. duration (HH:MM)	
Priority	Medium

#518 : Verify Proposal Count is Displayed Correctly	
Author	Dinesh Saiwal
Summary	Validate that the total number of proposals is displayed correctly.
Precondition	There should be at least one proposal in the system.

Estimated exec. duration (HH:MM)	
Priority	High

#519 : Verify Bid Won Count is Displayed Correctly	
Author	Dinesh Saiwal
Summary	Validate that the count of won bids is accurate and reflects the system's data.
Precondition	At least one proposal should have a "Bid Won" status.
Estimated exec. duration (HH:MM)	
Priority	High

#520 : Verify Profit Margin is Displayed Correctly	
Author	Dinesh Saiwal
Summary	Check if the profit margin value is displayed as per the system's calculations.
Precondition	Profit margin data should be available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#521 : Verify Team Members Count is Displayed Correctly	
Author	Dinesh Saiwal
Summary	Ensure the count of team members involved in proposals is accurate.
Precondition	There should be active team members in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#522 : Verify In-Progress Proposal Count is Displayed Correctly	
Author	Dinesh Saiwal
Summary	Validate that the number of in-progress proposals is accurate.
Precondition	There should be at least one proposal in progress.
Estimated exec. duration (HH:MM)	
Priority	High

#523 : Verify Table Displays In-Progress Proposals	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure that the table correctly lists all in-progress proposals.&nbsp;
Precondition	There should be in-progress proposals available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#524 : Verify Proposal ID is Displayed in the Table	
Author	Dinesh Saiwal
Summary	&nbsp; Validate that each in-progress proposal has a unique Proposal ID displayed.&nbsp;
Precondition	Proposal ID should be generated for each proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#525 : Verify Proposal Title is Displayed in the Table	
Author	Dinesh Saiwal
Summary	&nbsp; Ensure that the correct Proposal Title is displayed for each in-progress proposal.&nbsp;

Precondition	Proposals should have titles defined in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#526 : Verify Client Name is Displayed in the Table	
Author	Dinesh Saiwal
Summary	Validate that the correct Client name is shown for each proposal.
Precondition	Each proposal should have an assigned client.
Estimated exec. duration (HH:MM)	
Priority	High

#527 : Verify Due Date is Displayed in the Table	
Author	Dinesh Saiwal
Summary	Ensure that the due date for each proposal is correctly displayed.
Precondition	Each proposal should have a due date assigned.

Estimated exec. duration (HH:MM)	
Priority	High

#528 : Verify Progress Bar is Displayed for In-Progress Proposals	
Author	Dinesh Saiwal
Summary	Validate that a progress bar is present and represents the proposal’s completion percentage.
Precondition	At least one proposal should have a progress percentage assigned.
Estimated exec. duration (HH:MM)	
Priority	High

#529 : Verify Progress Bar Updates Based on Proposal Status	
Author	Dinesh Saiwal
Summary	Ensure that the progress bar updates dynamically when the proposal progresses.
Precondition	Proposal should have an updated progress percentage.
Estimated exec. duration (HH:MM)	
Priority	High

#530 : Verify Proposal Metrics Chart is Displayed	
Author	Dinesh Saiwal
Summary	Ensure that the Proposal Metrics Overview chart is visible on the dashboard and can be accessed by the user.
Precondition	User is logged into the Powergear application with valid credentials.User has access to the dashboard page.
Estimated exec. duration (HH:MM)	
Priority	High

#531 : Verify X-Axis Displays Dates Correctly	
Author	Dinesh Saiwal
Summary	Ensure that the X-axis of the multi-line chart displays dates correctly.
Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data with dates is available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#532 : Verify Y-Axis Displays Proposal Count Correctly	

Author	Dinesh Saiwal
Summary	&nbsp;Verify that the Y-axis of the multi-line chart accurately represents the count of proposals.&nbsp;
Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data with counts is available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#533 : Verify Total Proposals Line is Displayed	
Author	Dinesh Saiwal
Summary	Ensure that the line representing "Total Proposals" is visible and correctly reflects the total proposal count.
Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data with totals is available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#534 : Verify Losing Proposals Line is Displayed	
Author	Dinesh Saiwal
Summary	Ensure that the line representing "Losing Proposals" is visible and correctly reflects the number of lost proposals.&nbsp;

Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data with status "lost" is available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#535 : Verify Winning Proposals Line is Displayed	
Author	Dinesh Saiwal
Summary	Ensure that the line representing "Winning Proposals" is visible and correctly reflects the number of won proposals.
Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data with status "won" is available in the system.
Estimated exec. duration (HH:MM)	
Priority	High

#536 : Verify Chart Updates Based on Data Changes	
Author	Dinesh Saiwal
Summary	Ensure that the multi-line chart updates dynamically when proposal data changes (e.g., new proposal is added or marked as won/lost).
Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data is available and can be edited or added.

Estimated exec. duration (HH:MM)	
Priority	High

#537 : Verify Donut Chart is Displayed	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that the Donut Chart is visible on the dashboard and can be accessed by the user.&nbsp;
Precondition	User is logged into the Powergear application with valid credentials.User has access to the dashboard page.
Estimated exec. duration (HH:MM)	
Priority	High

#541 : Verify Hover Displays Percentage for Each Segment	
Author	Dinesh Saiwal
Summary	Ensure that when the user hovers over any segment of the Donut Chart, the percentage for that segment is displayed correctly.&nbsp;
Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data for total, in-progress, and rejected proposals is available in the system.
Estimated exec. duration (HH:MM)	

Priority	High
----------	------

#542 : Verify Donut Chart Updates Based on Proposal Data Changes	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that the Donut Chart updates dynamically when proposal data changes (e.g., new proposal added, status updated).&nbsp;
Precondition	User is logged into the Powergear application and has access to the dashboard.Proposal data is available and can be edited or added.
Estimated exec. duration (HH:MM)	
Priority	High

#562 : Verify Proposal Status Categories Are Displayed in Donut Chart	
Author	Dinesh Saiwal
Summary	Check if all the proposal status categories (Not Selected, In Progress, On Hold, Withdrawn, Submitted, Short Listed, Won, Rejected) are represented in the Donut Chart.&nbsp;
Precondition	The system contains proposals with different statuses.
Estimated exec. duration (HH:MM)	
Priority	High

--

#563 : Verify Percentage Calculation for Each Proposal Status	
Author	Dinesh Saiwal
Summary	Validate that the percentage displayed on hover is correctly calculated based on the total number of proposals.
Precondition	Multiple proposals exist in different statuses.
Estimated exec. duration (HH:MM)	
Priority	High

#564 : Verify Hover Functionality on Donut Chart	
Author	Dinesh Saiwal
Summary	Ensure that when hovering over a section of the Donut Chart, the status name and percentage are displayed correctly.
Precondition	The Donut Chart must be present with data.
Estimated exec. duration (HH:MM)	
Priority	High

## 1.11 Folder : Notification

#543 : Verify Team Member Gets Notification When a Section is Assigned
--

Author	Dinesh Saiwal
Summary	&nbsp;Ensure that team members receive a notification when a section is assigned to them.&nbsp;&nbsp;
Precondition	User is logged into the Powergear application with valid credentials as a Team Member.A section is assigned to the team member.
Estimated exec. duration (HH:MM)	
Priority	High

#544 : Verify Team Member Gets Notification When There is Approval on a Section	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that team members receive a notification when their section is approved.&nbsp;
Precondition	User is logged into the Powergear application as a Team Member.A section is assigned and awaiting approval.
Estimated exec. duration (HH:MM)	
Priority	High

#545 : Verify Team Member Gets Notification When a Section is Rejected and Re-assigned	
Author	Dinesh Saiwal
Summary	Ensure that team members receive a notification when a section is rejected and re-assigned.&nbsp;

Precondition	User is logged into the Powergear application as a Team Member.A section is assigned to the user and then rejected.
Estimated exec. duration (HH:MM)	
Priority	High

#546 : Verify Team Member Gets Notification for Proposal Status Change (Submitted)	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that team members receive a notification when the proposal status is changed to "Submitted".&nbsp;
Precondition	User is logged into the Powergear application as a Team Member.A proposal is in progress and its status is updated.
Estimated exec. duration (HH:MM)	
Priority	High

#547 : Verify Team Member Gets Notification for Proposal Status Change (Won)	
Author	Dinesh Saiwal
Summary	Ensure that team members receive a notification when the proposal status is changed to "Won".&nbsp;
Precondition	User is logged into the Powergear application as a Team Member.A proposal is in progress and its status is updated.

Estimated exec. duration (HH:MM)	
Priority	High

#548 : Verify Team Member Gets Notification for Proposal Status Change (Shortlisted)	
Author	Dinesh Saiwal
Summary	Ensure that team members receive a notification when the proposal status is changed to "Shortlisted".&nbsp;
Precondition	User is logged into the Powergear application as a Team Member.A proposal is in progress and its status is updated.
Estimated exec. duration (HH:MM)	
Priority	High

#549 : Verify Notification for "Rejected" Status Change	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that a notification is sent when the proposal status changes to "Rejected".&nbsp;
Precondition	User is logged into the Powergear application.A proposal status is updated to "Rejected".
Estimated exec. duration (HH:MM)	
Priority	High

#550 : Verify Notification for "Not Selected" Status Change	
Author	Dinesh Saiwal
Summary	Ensure that a notification is sent when the proposal status changes to "Not Selected".
Precondition	User is logged into the Powergear application.
Estimated exec. duration (HH:MM)	
Priority	High

#551 : Verify Notification for "Withdrawn" Status Change	
Author	Dinesh Saiwal
Summary	Ensure that a notification is sent when the proposal status changes to "Withdrawn".
Precondition	User is logged into the Powergear application.A proposal status is updated to "Withdrawn".
Estimated exec. duration (HH:MM)	
Priority	High

#552 : Verify Notification for "On Hold" Status Change	

Author	Dinesh Saiwal
Summary	&nbsp;Ensure that a notification is sent when the proposal status changes to "On Hold".&nbsp;
Precondition	User is logged into the Powergear application.A proposal status is updated to "On Hold".
Estimated exec. duration (HH:MM)	
Priority	High

#553 : Verify Bid Manager Gets Notification When a New Team Member is Added	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that Bid Managers receive a notification when a new team member is added.&nbsp;
Precondition	User is logged into the Powergear application as a Bid Manager.A new team member is added to a proposal or project.
Estimated exec. duration (HH:MM)	
Priority	High

#554 : Verify Bid Manager Gets Notification When a Section is Submitted for Review	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that Bid Managers receive a notification when a section is submitted for review.&nbsp;

Precondition	User is logged into the Powergear application as a Bid Manager.A section is assigned to a team member and submitted for review.
Estimated exec. duration (HH:MM)	
Priority	High

#555 : Verify Bid Manager Gets Notification When a Budget Section is Added	
Author	Dinesh Saiwal
Summary	&nbsp;Ensure that Bid Managers receive a notification when a budget section is added.&nbsp;
Precondition	User is logged into the Powergear application as a Bid Manager.A budget section is added to the proposal.
Estimated exec. duration (HH:MM)	
Priority	High

#556 : Verify Bid Manager Gets Notification When AI Agent Training is Completed	
Author	Dinesh Saiwal
Summary	Ensure that Bid Managers receive a notification when the AI agent training is completed.&nbsp;
Precondition	User is logged into the Powergear application as a Bid Manager.The AI agent training process is completed.

Estimated exec. duration (HH:MM)	
Priority	High

#557 : Verify User Gets Notification When Mentioned in a Comment or Activity Section	
Author	Dinesh Saiwal
Summary	
Precondition	
Estimated exec. duration (HH:MM)	
Priority	High

#558 : Verify User Gets Notification When Added as a Participant for a Proposal	
Author	Dinesh Saiwal
Summary	
Precondition	
Estimated exec. duration (HH:MM)	
Priority	High

#559 : Verify User Gets Notification When Removed as a Participant for a Proposal	
Author	Dinesh Saiwal
Summary	
Precondition	
Estimated exec. duration (HH:MM)	
Priority	High

#560 : Verify "Mark All as Read" Button Functionality	
Author	Dinesh Saiwal
Summary	This test case verifies that the "Mark All as Read" button correctly updates all unread notifications to a read state.
Precondition	User must be logged into the Powergear application. There should be at least one unread notification in the Notifications section.
Estimated exec. duration (HH:MM)	
Priority	High

#561 : Verify User Gets Notification When Proposal Status Changes to "In Progress"	

Author	Dinesh Saiwal
Summary	This test case verifies that users receive a notification when the status of a proposal changes to In Progress.
Precondition	User must be logged into the Powergear application.The user must be associated with the proposal as a Team Member or Bid Manager.The proposal should exist in the system with a different status (e.g., Submitted, Shortlisted).
Estimated exec. duration (HH:MM)	
Priority	High
